Computational strategies for selective inhibition of falcipain-2

JE Hernández González - 2020 - repositorio.unesp.br
A falcipaína-2 (FP-2) é uma hemoglobinase chave do Plasmodium falciparum, frequentemente selecionada como alvo para o planejamento de fármacos antimaláricos …

Glycosaminoglycan Mimetics for the Treatment of Cancer and Lung Inflammation

S Morla - 2019 - scholarscompass.vcu.edu
Glycosaminoglycans (GAGs) are linear polysaccharides whose disaccharide building blocks consist of an amino sugar and either uronic acid or galactose. They are expressed on …

Reconfigurable DNA-nanochambers as dynamic compartmentalization systems

EC Schöneweiß - 2018 - duepublico2.uni-due.de
The 21th century is a representative era for the enormous revolution of the nanotechnology research field, growing parallel to device miniaturization and the development of …

Study of Molecular Interactions of Glycosaminoglycans and Glycosaminoglycan Mimetics with Their Protein Targets

DK Afosah - 2017 - scholarscompass.vcu.edu
Glycosaminoglycans (GAGs) are complex linear chain carbohydrate molecules found on virtually all animal cell surfaces. Owing to their negatively charged nature, GAGs interact …
