Big-data glycomics: tools to connect glycan biosynthesis to extracellular communication

BP Kellman, NE Lewis - Trends in biochemical sciences, 2021 - cell.com

Characteristically, cells must sense and respond to environmental cues. Despite the importance of cell–cell communication, our understanding remains limited and often lacks …

Breast milk oligosaccharides contain immunomodulatory glucuronic acid and LacdiNAc

C Jin, J Lundstrøm, E Korhonen, AS Luis… - Molecular & Cellular …, 2023 - mcponline.org

Breast milk is abundant with functionalized milk oligosaccharides (MOs) to nourish and protect the neonate. Yet we lack a comprehensive understanding of the repertoire and …

FAIMS enhances the detection of PTM crosstalk sites

KR Adoni, DL Cunningham, JK Heath… - Journal of proteome …, 2022 - pmc.ncbi.nlm.nih.gov

Protein post-translational modifications (PTMs) enable cells to rapidly change in response to biological stimuli. With hundreds of different PTMs, understanding these control mechanisms …

DIONYSUS: a database of protein–carbohydrate interfaces

A Gheeraert, T Bailly, Y Ren, A Hamraoui… - Nucleic Acids …, 2025 - academic.oup.com

Protein-carbohydrate interactions govern a wide variety of biological processes and play an essential role in the development of different diseases. Here, we present DIONYSUS, the …

Next-generation protein sequencing and individual ion mass spectrometry enable complementary analysis of interleukin-6: KA Skinner et al.

KA Skinner, TD Fisher, A Lee, T Su, E Forte… - Analytical and …, 2025 - Springer

The vast complexity of the proteome currently overwhelms any single analytical technology in capturing the full spectrum of proteoform diversity. In this study, we evaluated the …

Worldwide glycoscience informatics infrastructure: the GlySpace Alliance

F Lisacek, M Tiemeyer, R Mazumder… - JACS Au, 2023 - ACS Publications

Abstract The GlySpace Alliance was formed in 2018 among the principal investigators of three major glycoscience portals: Glyco@ Expasy, GlyCosmos, and GlyGen, representing …

Glycoproteomics analysis of complement factor H and its complement-regulatory function during *Streptococcus pneumoniae*-associated hemolytic uremic syndrome

LM Baas, KL Wijnsma, F Zijlstra… - Frontiers in …, 2025 - frontiersin.org

Hemolytic uremic syndrome caused by an invasive Streptococcus pneumoniae infection (SP-HUS) is a rare and severe disease that primarily affects children under two years of age. The …

Aberrant oxidative modifications of neutrophil myeloperoxidase in anti-neutrophil cytoplasmic antibody-associated vasculitis

M Sato, K Nagai, T Sato, R Yoshimoto, Y Shibano… - Journal of …, 2025 - Elsevier

Anti-neutrophil cytoplasmic antibodies directed to myeloperoxidase (MPO-ANCA) are key molecules in the pathogenesis of ANCA-associated vasculitis (AAV), however, the …
