Rubicon modulates neuroimmune responses following traumatic brain injury

S Thapa, A Mehrabani-Tabari, O Pettyjohn-Robin… - …, 2026 - pmc.ncbi.nlm.nih.gov

Traumatic brain injury (TBI) elicits robust neuroinflammation and oxidative stress, coupled with an acute inhibition of macro-autophagy (autophagy) in neurons and microglia. Rubicon …

Construction of 2DE patterns of plasma proteins: aspect of potential tumor markers

S Naryzhny, N Ronzhina, E Zorina… - International Journal of …, 2022 - mdpi.com

The use of tumor markers aids in the early detection of cancer recurrence and prognosis. There is a hope that they might also be useful in screening tests for the early detection of …

Glycomics-informed glycoproteomic analysis of site-specific glycosylation for SARS-CoV-2 spike protein

KE Rosenbalm, M Tiemeyer, L Wells, K Aoki, P Zhao - STAR protocols, 2020 - cell.com

This protocol describes an integrated approach for analyzing site-specific N-and O-linked glycosylation of SARS-CoV-2 spike protein by mass spectrometry. Glycoproteomics …

A hierarchical lectin-based multimodal workflow for spatial mapping of extracellular matrix glycans in fibrotic hearts: Boottanun et al.

P Boottanun, C Nagai-Okatani, K Kawanishi… - Analytical and …, 2026 - Springer

Cardiac fibrosis with excessive extracellular matrix (ECM) accumulation is a hallmark of hypertensive heart failure. Characterizing glycan alterations within fibrotic ECM requires …

GlyComboCLI enables command line-based FAIR workflows for glycan composition assignment in mass spectrometry data

MI Kelly, WCM Thang, CNI Pang, OJR Gustafsson… - bioRxiv, 2026 - biorxiv.org

Glycans are integral biomolecules whose presence cannot be predicted from genomic data alone, necessitating experimental characterisation through approaches including mass …

Mapping O-and N-glycosylation in transmembrane and interface regions of proteins: insights from a database search study

GDC Anghelescu, M Mernea… - International Journal of …, 2025 - mdpi.com

Glycosylation is a critical post-translational modification that influences protein folding, stability and function. While extensively studied in extracellular and intracellular regions …

CarbArrayART: a new software tool for carbohydrate microarray data storage, processing, presentation, and reporting

Y Akune, S Arpinar, LM Silva, AS Palma… - …, 2022 - academic.oup.com

Glycan microarrays are essential tools in glycobiology and are being widely used for assignment of glycan ligands in diverse glycan recognition systems. We have developed a …

Modeling and integration of *N*-glycan biomarkers in a comprehensive biomarker data model

DF Lyman, A Bell, A Black, H Dingerdissen… - …, 2022 - academic.oup.com

Molecular biomarkers measure discrete components of biological processes that can contribute to disorders when impaired. Great interest exists in discovering early cancer …

PolarProtDb: a database of transmembrane and secreted proteins showing apical-basal polarity

A Zeke, L Dobson, LI Szekeres, T Langó… - Journal of Molecular …, 2021 - Elsevier

Most cells in multicellular organisms are somehow asymmetric, polarized: maintaining separate membrane domains. Typical examples are the epithelial cells (apical-basal …

Bioinformatics tools developed to support BioCompute Objects

JA Patel, DA Dean, CH King, N Xiao, S Koc… - Database, 2021 - academic.oup.com

Developments in high-throughput sequencing (HTS) result in an exponential increase in the amount of data generated by sequencing experiments, an increase in the complexity of …
