CarbDisMut: database on neutral and disease-causing mutations in human carbohydrate-binding proteins

NRS Shanmugam, A Kulandaisamy, K Veluraja… - …, 2024 - academic.oup.com

Protein-carbohydrate interactions are involved in several cellular and biological functions. Integrating structure and function of carbohydrate-binding proteins with disease-causing …

GlycoDiveR: a modular R framework to analyze and visualize highly dimensional glycoproteomics data

TS Veth, NM Riley - bioRxiv, 2026 - pmc.ncbi.nlm.nih.gov

Mass spectrometry-based glycoproteomics is a critical platform for understanding the complex roles of protein glycosylation in biological systems, yet visualizing multidimensional …

Insights into bioinformatic applications for glycosylation: instigating an awakening towards applying glycoinformatic resources for cancer diagnosis and …

M Muthu, S Chun, J Gopal, V Anthonydhason… - International Journal of …, 2020 - mdpi.com

Glycosylation plays a crucial role in various diseases and their etiology. This has led to a clear understanding on the functions of carbohydrates in cell communication, which …

Molecular mechanisms of immune evasion by host protein glycosylation of a bacterial immunogen used in nucleic acid vaccines

MS Cinar, TM Adams, FZ Nawaz, ES Demir… - Journal of Biological …, 2026 - jbc.org

Nucleic acid vaccines (DNA and mRNA) induce immunity by driving in situ antigen expression in host cells. For nonviral pathogens, however, host expression can impose post …

Preparing glycomics data for robust statistical analysis with GlyCompareCT

Y Zhang, S Krishnan, B Bao, AWT Chiang… - STAR protocols, 2023 - cell.com

GlyCompareCT is a portable command-line tool to facilitate downstream glycomic data analyses, by addressing data inherent sparsity and non-independence. Inputting glycan …

Complex carbohydrates catabolism capacity of bladder microbiota inhabiting healthy and overactive female bladders.

JF Gourdine, IV Pacentine, A Barstad… - bioRxiv: the preprint …, 2025 - europepmc.org

Overactive bladder syndrome (OAB) is a poorly understood symptom complex that affects 40% of females over the age of 40, with clinical features including urinary urgency and …

CBMcarb-DB: interface of the three-dimensional landscape of carbohydrate-binding modules

DO Ribeiro, F Bonnardel, AS Palma, ALM Carvalho… - 2024 - books.rsc.org

Carbohydrate-binding-modules (CBMs) are discrete auxiliary protein modules with a non-catalytic carbohydrate-binding function and that exhibit a great diversity of binding …

Playbook Workflow Builder: Interactive construction of bioinformatics workflows from a network of microservices

DJB Clarke, JE Evangelista, Z Xie, GB Marino… - bioRxiv, 2024 - biorxiv.org

Many biomedical research projects produce large-scale datasets that may serve as resources for the research community for hypothesis generation, facilitating diverse use …

GenPTM: a generalizable framework for protein post-translational modification information extraction from the scientific literature

S Bhowmik, K Ross, C Chen, C Wu, K Vijay-Shanker - Research Square, 2026 - Springer

Background Protein post-translational modification (PTM) plays a pivotal role in cellular activities and biological processes. Although several databases curate PTM information …

Protocol for constructing glycan biosynthetic networks using glycowork

J Lundstrøm, L Thomes, D Bojar - STAR Protocols, 2024 - cell.com

Glycans, present across all domains of life, comprise a wide range of monosaccharides assembled into complex, branching structures. Here, we present an in silico protocol to …
