Factor XI/XIa inhibitors: a potential solution to anticoagulation dilemmas

CM Gibson, UR Desai, ME Wesling - Expert Opinion on …, 2025 - Taylor & Francis

Introduction Antithrombotic therapy is the cornerstone of stroke prevention, but standard of care therapies are underutilized and use is limited by bleeding rates, drug interactions, and …

AlphaFold3 assisted screening strategy identifying novel coagulation factor XIa inhibitory peptides from deep-sea mussel Gigantidas platifrons

Y Ouyang, Y Yue, Q Suo, H Chen, J Wang, N Wu… - Bioresource …, 2026 - Elsevier

Marine mussels represent a valuable source for discovery of novel biologically active peptides targeting key enzymes in the coagulation system. However, traditional iterative …

Factor XI as a target for antithrombotic therapy

CE Bane Jr, D Gailani - Drug discovery today, 2014 - Elsevier

Highlights•Factor XI is the precursor of a plasma protease (factor XIa) that contributes to normal blood coagulation (hemostasis).•Factor XIa contributes to thrombosis in humans.•In …

Discovery of Novel FXIa Inhibitory Peptides from Deep-Sea Gigantidas platifrons Hydrolysates: AI-Guided Screening, Anticoagulant Activity, and Mechanistic Insights

Y Ouyang, H Chen, J Wang, N Wu, L Geng… - Journal of Agricultural …, 2026 - ACS Publications

The development of anticoagulants targeting coagulation factor XIa (FXIa) is a promising strategy to reduce thrombotic risk while minimizing bleeding complications. However, FXIa …

Inhibition of herpes simplex virus-1 entry into human cells by nonsaccharide glycosaminoglycan mimetics

RN Gangji, NV Sankaranarayanan… - ACS Medicinal …, 2018 - pmc.ncbi.nlm.nih.gov

Although heparan sulfate (HS) has been implicated in facilitating entry of enveloped viruses including herpes simplex virus (HSV), small molecules that effectively compete with this …

Discovery of benzyl tetraphosphonate derivative as inhibitor of human factor Xia

S Kar, M Mottamal, RA Al-Horani - ChemistryOpen, 2020 - Wiley Online Library

The inhibition of factor XIa (FXIa) is a trending paradigm for the development of new generations of anticoagulants without a substantial risk of bleeding. In this report, we present …

Allosteric inhibition of factor XIa. Sulfated non-saccharide glycosaminoglycan mimetics as promising anticoagulants

RA Al-Horani, D Gailani, UR Desai - Thrombosis research, 2015 - Elsevier

Recent development of sulfated non-saccharide glycosaminoglycan mimetics, especially sulfated pentagalloyl glucopyranoside (SPGG), as potent inhibitors of factor XIa (FXIa)(J …

Discovery of allosteric modulators of factor XIa by targeting hydrophobic domains adjacent to its heparin-binding site

R Karuturi, RA Al-Horani, SC Mehta… - Journal of medicinal …, 2013 - pmc.ncbi.nlm.nih.gov

To discover promising sulfated allosteric modulators (SAMs) of glycosaminoglycan-binding proteins (GBPs), such as human factor XIa (FXIa), we screened a library of 26 synthetic …

Lignosulfonic acid sodium is a noncompetitive inhibitor of human factor XIa

S Kar, P Bankston, DK Afosah, RA Al-Horani - Pharmaceuticals, 2021 - mdpi.com

The anticoagulant activity of lignosulfonic acid sodium (LSAS), a non-saccharide heparin mimetic, was investigated in this study. LSAS is a relatively safe industrial byproduct with …

Designing synthetic, sulfated glycosaminoglycan mimetics that are orally bioavailable and exhibiting in vivo anticancer activity

S Morla, O Ravikumar, C O'Hara… - Journal of Medicinal …, 2023 - pmc.ncbi.nlm.nih.gov

Sulfated glycosaminoglycans (GAGs), or synthetic mimetics thereof, are not favorably viewed as orally bioavailable drugs owing to their high number of anionic sulfate groups …
