NAR-03044-Data-E-2020
LectomeXplore, an update of UniLectin for the discovery of carbohydrate-binding proteins based on a new lectin classification

Dear Dr Mehta,

Thank you very much for helping us by giving us your review. We hope you will be willing to referee for us again in the future.

This email has been copied to Prof. Daniel Rigden as an alert that you have returned your review.

NAR considers referee reports to be confidential. They should not be made publicly available without the express permission of the Editors. NAR may opt to transfer manuscripts that are scientifically sound but too incremental or out of scope to a related OUP journal, along with the referees' names and reports. Anonymity will be maintained but if you object to this, please do let us know.

With best wishes
