Revealing the evolution towards complex N-glycan specificities of human H1 influenza A viruses.

A Canales, J Sastre, JM Orduña, J Pérez-Castells… - 2022 - chemrxiv.org

Influenza virus infection remains a threat to human health since viral hemagglutinins are constantly drifting, escaping infec-tion and vaccine-induced antibody responses. During …

Avian and Human Influenza Viruses Exhibit Distinct Glycoconjugate Receptor Specificities in Human Lung Cells

CY Liang, I Huang, J Han, S Manivasagam, J Plung… - bioRxiv, 2022 - biorxiv.org

IAV utilize sialic acid (Sia) containing cell surface glycoconjugates for host cell infection, and IAV strains from different host species show preferences for structurally distinct Sia at the …

Mucin-Mediated and Interferon-Driven Defense Mechanisms against Influenza Virus Infection in Human Airway Epithelium

EB Iverson - 2022 - search.proquest.com

The human airway epithelium represents the primary site of infection for many respiratory viruses, including influenza A virus (IAV). To safeguard this tissue and maintain the …

Evaluation of the Antiviral Effect of Polyglycerols Functionalized with Sialic Acid on Influenza Virus

MN Stadtmüller - 2021 - edoc.hu-berlin.de

Abstract Ein vielversprechender Ansatz zur Verhinderung von Infektionen mit Influenzavirus ist die kompetitive Inhibition der Virusanhaftung an die Wirtszellen durch Behinderung der …

N-Glycans as Receptors for Influenza A Viruses

F Broszeit - 2021 - research-portal.uu.nl

The influenza virus has created a major burden for human health throughout the last centuries. Seasonal epidemics and reoccurring pandemics continuously infect a substantial …

Influenza A Virus Fitness Is Linked with Antigenic Changes in the Hemagglutinin and Neuraminidase Proteins

HR Powell - 2020 - search.proquest.com

Influenza virus remains a public health burden. Each year millions of people are infected and potentially thousands succumb to illness. In recent years the efficacy of the live …

Identification of Influenza Hemagglutinin Residues Critical for Membrane Fusion Activity

J Trost - 2020 - search.proquest.com

Influenza is a major public health risk causing annual seasonal epidemics and sporadic pandemics when a subtype transmits to naïve human population and circulates. Current …
