The structural role of gangliosides: insights from X-ray scattering on model membranes

K Andreev - Current Medicinal Chemistry, 2020 - ingentaconnect.com

Background: Gangliosides are an essential component of eukaryotic plasma membranes implicated in multiple physiological processes. Little is known about molecular mechanisms …

Biological Characteristics of the Epidemic Influenza A/Singapore/GP20238/2024 (H3N2) Virus and Derived Vaccine Strains

IV Kiseleva, DD Sokolovsky, NV Larionova… - Russian Journal of …, 2026 - iimmun.ru

Currently, only two sets of donors of attenuation (A and B) for preparation of licensed live influenza cold-adapted reassortant intranasal vaccines (LAIV) are available globally …

The receptor binding properties of H5Nx influenza A viruses have evolved to promiscuously bind to avian-type mucin-like O-glycans

J Weber, NLD Ponse, X Zhu, MR Carrasco, AX Han… - bioRxiv, 2025 - biorxiv.org

Highly pathogenic H5Nx influenza A viruses are causing unprecedented, season-independent outbreaks across avian and mammalian species, including dairy cattle, a novel …

Viral envelope proteins fused to multiple distinct fluorescent reporters to probe receptor binding

I Tomris, R van Der Woude… - Protein …, 2024 - Wiley Online Library

Enveloped viruses carry one or multiple proteins with receptor-binding functionalities. Functional receptors can be glycans, proteinaceous, or both; therefore, recombinant protein …

Membrane-Tethered Mucin 1 is stimulated by interferon in multiple cell types and antagonizes influenza A virus infection in human airway epithelium

E Iverson, K Griswold, D Song, TB Gagliardi… - bioRxiv, 2021 - biorxiv.org

Influenza A virus (IAV) causes seasonal epidemics and periodic pandemics, resulting in significant morbidity and mortality in the human population. Tethered mucin 1 (MUC1) is …

Полиморфизм промотора гена IL-4 (C589T) и его влияние на показатель лимфоцитарно-тромбоцитарной адгезии и содержание интерлейкина 4 в крови …

АС Емельянов, ГА Чупрова… - Забайкальский …, 2024 - zabmedvestnik.ru

Аннотация Цель исследования: изучение частоты полиморфных аллелей и генотипов промотора гена IL-4 (C589T) rs2243250, а также их влияния на показатель …

H7 influenza A viruses bind sialyl-LewisX, a potential intermediate receptor between species

CM Spruit, DI Palme, T Li, M Ríos Carrasco, AG García… - bioRxiv, 2023 - biorxiv.org

Influenza A viruses (IAVs) can overcome species barriers by adaptation of the receptor binding site of the hemagglutinin (HA). To initiate infection, HAs bind to glycan receptors with …

Revealing interspecies transmission barriers of avian influenza A viruses

MM Naguib, P Eriksson, E Jax, J Nilsson, C Sihlbom… - bioRxiv, 2020 - biorxiv.org

Influenza A virus (IAV) pandemics result from interspecies transmission events within the avian reservoir and further to mammals including humans. Investigating molecular virus …

Identifying Host Genetic Targets for Limiting Susceptibility to Respiratory Viral Infections

JD Trimarco - 2024 - search.proquest.com

Viral diseases present unique and severe threats to global health. Our current approach to combatting these infections is two-pronged and includes prophylactic prevention of infection …

Deciphering Receptor Binding Landscapes: AI-Enabled Insights Into Influenza Phenotype Prediction

L Borkenhagen - 2024 - search.proquest.com

As real-time surveillance efforts reveal the host range expansion of the H5 highly pathogenic avian influenza virus, the urgent need of methods for rapid viral characterization to identify …
