Synthesis of sulfonated peptides using a trifluoromethyltoluene-protected amino acid

AE DeYong, K Li, EL Chaikof - The Journal of Organic Chemistry, 2025 - ACS Publications

A scalable, seven step synthesis is reported for a trifluoromethyl toluene protected sulfonated phenylalanine building block whose utility was demonstrated in the synthesis of …

The key role of metal adducts in the differentiation of phosphopeptide from sulfopeptide sequences by high-resolution mass spectrometry

S Piovesana, AL Capriotti, C Cavaliere… - Analytical …, 2022 - ACS Publications

Site localization of protein sulfation by high-throughput proteomics remains challenging despite the technological improvements. In this study, sequence analysis and site …

Identification and computational analysis of conserved YXXΦ motifs in the pan-serotypes of dengue virus NS5 protein and their implications in host-virus interactions

A Khalil, F Noor, M Tahir ul Qamar… - Journal of …, 2026 - Taylor & Francis

Dengue is a major global health challenge, caused by the dengue virus (DENV) and transmitted through the Aedes aegypti mosquito. The four DENV serotypes (DENV1-4) infect …

Efficient TurboID-based proximity labelling method for identifying terminal sialic acid glycosylation in living cells: New technique to identify sialic acid

W Liu, Y Long, Y Bao, Y Li, M Deng… - Acta Biochimica et …, 2022 - pmc.ncbi.nlm.nih.gov

TurboID, a proximity labelling method based on mutant biotin ligase, is an efficient new technique for recognizing protein-protein interactions and has been successfully applied to …

An integrated mass spectrometry strategy for quantifying the proteoform diversity of the extensively modified O-glycoprotein Osteopontin

KC Zouboulis, JL Bennett, LA Daly, SA Burnap… - bioRxiv, 2026 - biorxiv.org

O-glycosylation is among the most abundant and structurally diverse post-translational modifications in eukaryotes, yet its heterogeneity renders O-glycoproteins exceptionally …

Metabolomic and Lipidomic Analysis of Manganese-Associated Parkinsonism: a Case-Control Study in Brescia, Italy

F Lewis, D Shoieb, S Azmoun, E Colicino, Y Jin… - medRxiv, 2024 - pmc.ncbi.nlm.nih.gov

Background and Objectives: Excessive Manganese (Mn) exposure is neurotoxic and can cause Mn-Induced Parkinsonism (MnIP), marked by cognitive and motor dysfunction …

Synthesis of cyclic glycopeptide inhibitors of P-selectin and glycans from Gram negative bacteria

CM Lehmann - 2024 - ses.library.usyd.edu.au

Proteins are the most abundant and diverse class of biological macromolecules and are involved in virtually all physiological processes. The majority of proteins contain post …

Sulfotyrosine, an interaction specificity determinant for extracellular protein-protein interactions

V Stewart, PC Ronald - bioRxiv, 2021 - biorxiv.org

Tyrosine sulfation, a post-translational modification, can enhance and often determine protein-protein interaction specificity. Sulfotyrosyl residues (sTyr) are formed by tyrosyl …

Characterization of protein post-translational modifications using 193 nm ultraviolet photodissociation mass spectrometry

A Bashyal - 2023 - repositories.lib.utexas.edu

Protein characterization remains the highest-impact application and one of the critical challenges for mass spectrometry. The dissertation begins with a fundamental investigation …
