ASSESSING DRUG DEVELOPMENT PROPORTIES OF ANTITHROMBOTIC AND ANTI-CANCER AGENTS

El Abdelfadiel - 2023 - scholarscompass.vcu.edu

The current GAG anticoagulants such as heparin, heparin derivatives, and vitamin K antagonists, such as warfarin continue to be the backbone of anticoagulant therapy. These …

Discovery of an enzyme and substrate selective inhibitor of ADAM10 using an exosite-binding glycosylated substrate

M Cudic, LD Scampavia, D Minond - academia.edu

Results Assay Miniaturization and Primary HTS campaign. To enable uHTS both ADAM10 and ADAM17 glycosylated substrate13 (Fig. 1A) assays were miniaturized to 1536 well plate …

The Chemical Biology of Thrombin

RL Lundblad - 2022 - books.google.com

This book is a comprehensive review of thrombin, especially as regulatory protease. The ready availability of highly purified thrombin has stimulated rapid advances in the cell …

CHARACTERIZING GLYCOSAMINOGLYCAN AND GLYCOSAMINOGLYCAN-OLIGO INTERACTIONS WITH CANCER STEM CELLS AND THEIR REGULATORS

R Navaz Gangji - 2020 - scholarscompass.vcu.edu

Tumor metastasis and recurrence account for more than 90% of cancer-associated deaths and are thought to occur due to a small subpopulation of neoplastic cells known as cancer …

Study of Molecular Interactions of Glycosaminoglycans and Glycosaminoglycan Mimetics with Their Protein Targets

DK Afosah - 2017 - scholarscompass.vcu.edu

Glycosaminoglycans (GAGs) are complex linear chain carbohydrate molecules found on virtually all animal cell surfaces. Owing to their negatively charged nature, GAGs interact …

Probing allosteric, partial inhibition of thrombin using novel anticoagulants

SS Verespy III - 2016 - search.proquest.com

Thrombin is the key protease that regulates hemostasis; the delicate balance between procoagulation and anticoagulation of blood. In clotting disorders, like deep vein thrombosis …

Synthetic, sulfated, lignin-based anticoagulants

AY Mehta - 2014 - search.proquest.com

Chemoenzymatically synthesized low molecular weight lignin polymers have been previously found to be potent inhibitors of a number of serine proteases via allosteric …
