QSAR Study of Thiophene-Anthranilamides Based Factor Xa Direct Inhibitors

PS Sidhu - Journal of Postdoctoral Research March, 2014 - scholar.archive.org

QSAR studies were performed to understand the structure activity relationship (SAR) and to build the computational model to predict newer inhibitors with improved potency. In this …

In-silico drug design approach to discover novel anti-coagulants

KR Methuku - Journal of Postdoctoral Research December, 2013 - scholar.archive.org

Conclusion In these studies, pharmacophore model for identifying the inhibitors of thrombin targeting the active site and exosites of thrombin was generated and validated using various …

Kinetic and Thermodynamic Studies of Thrombin Inhibitors

AM Abdel - 2013 - scholarscompass.vcu.edu

Sulfated low molecular weight lignins (LMWLs), CDSO3 and FDSO3, designed recently as macromolecular mimetics of heparin, were found to exhibit potent anticoagulant activity …

Kinetic and thermodynamic studies of thrombin inhibitors

MHA Aziz - 2013 - search.proquest.com

Sulfated low molecular weight lignins (LMWLs), CDSO 3 and FDSO 3, designed recently as macromolecular mimetics of heparin, were found to exhibit potent anticoagulant activity …

Designing direct and indirect factor Xa inhibitors

RA Al-Horani - 2012 - search.proquest.com

Anticoagulants are the basis for treatment and prevention of thrombotic diseases. The currently available medicines are associated with a wide range of adverse reactions that …

Design, synthesis, and biological evaluation of novel MCAK and 14-3-3 protein family inhibitors.

AA Arrendale - 2012 - search.proquest.com

The Borch lab is interested in the synthesis and biological evaluation of phosphopeptidomimetic prodrugs in order to disrupt proteins that are critical for cancer cell …

Conformationally restricted analogs of the direct thrombin inhibitor FM 19

HI Mosberg - Bioorganic & Medicinal Chemistry, 2011 - academia.edu

The serine protease thrombin plays several key roles in the clotting cascade within the hemostatic system, such as in fibrin formation and platelet activation. Thus, development of …

Interazioni tra acidi nucleici, proteine e potenziali farmaci antitumorali: un approccio chimico-fisico

A Cummaro - 2013 - tesidottorato.depositolegale.it

Nell'ambito della progettazione di farmaci (drug-design) le G-quadruplex rappresentano, da un lato, un target molecolare, dall'altro possono essere esse stesse utilizzate come veri e …
