Polycationic inhibitors to target prothrombotic nucleic acids in vitro and in mouse models

S Vappala - 2023 - open.library.ubc.ca

Thrombosis is a common pathology that underpins ischemic heart disease, ischemic stroke, and venous thromboembolism and has been linked to sepsis and cancer. Polyanionic …

Medically-induced hemophilia C to treat thrombosis

AH Schmaier - Thrombosis Research, 2015 - thrombosisresearch.com

Finding new targets to prevent thrombosis with reduced bleeding is the current therapeutic focus in the thrombosis field. When one evaluates the new parenteral (argatroban …

CHARACTERIZING GLYCOSAMINOGLYCAN AND GLYCOSAMINOGLYCAN-OLIGO INTERACTIONS WITH CANCER STEM CELLS AND THEIR REGULATORS

R Navaz Gangji - 2020 - scholarscompass.vcu.edu

Tumor metastasis and recurrence account for more than 90% of cancer-associated deaths and are thought to occur due to a small subpopulation of neoplastic cells known as cancer …

Study of Molecular Interactions of Glycosaminoglycans and Glycosaminoglycan Mimetics with Their Protein Targets

DK Afosah - 2017 - scholarscompass.vcu.edu

Glycosaminoglycans (GAGs) are complex linear chain carbohydrate molecules found on virtually all animal cell surfaces. Owing to their negatively charged nature, GAGs interact …
