Global O-glycoproteome enrichment and analysis enabled by a combinatorial enzymatic workflow

T Kang, R Budhraja, J Kim, N Joshi, K Garapati… - Cell Reports …, 2024 - cell.com

A comprehensive analysis of site-specific protein O-glycosylation is hindered by the absence of a consensus O-glycosylation motif, the diversity of O-glycan structures, and the …

Playbook workflow builder: Interactive construction of bioinformatics workflows

DJB Clarke, JE Evangelista, Z Xie… - PLOS Computational …, 2025 - journals.plos.org

The Playbook Workflow Builder (PWB) is a web-based platform to dynamically construct and execute bioinformatics workflows by utilizing a growing network of input datasets …

The tubulin database: Linking mutations, modifications, ligands and local interactions

I Abbaali, D Truong, SD Day, F Mushayeed… - PLoS …, 2023 - journals.plos.org

Microtubules are polymeric filaments, constructed of α-β tubulin heterodimers that underlie critical subcellular structures in eukaryotic organisms. Four homologous proteins (γ-, δ-, ε …

A genetically encoded magnetic resonance imaging reporter enables sensitive detection and tracking of spontaneous metastases in deep tissues

NN Nyström, SW McRae, FM Martinez, JJ Kelly… - Cancer …, 2023 - aacrjournals.org

Metastasis is the leading cause of cancer-related death. However, it remains a poorly understood aspect of cancer biology, and most preclinical cancer studies do not examine …

CarboGrove: a resource of glycan-binding specificities through analyzed glycan-array datasets from all platforms

ZL Klamer, CM Harris, JM Beirne, JE Kelly… - …, 2022 - academic.oup.com

Glycan arrays continue to be the primary resource for determining the glycan-binding specificity of proteins. The volume and diversity of glycan-array data are increasing, but no …

Unraveling the glycosylated immunopeptidome with HLA-Glyco

G Bedran, DA Polasky, Y Hsiao, F Yu… - Nature …, 2023 - nature.com

Recent interest in targeted therapies has been sparked by the study of MHC-associated peptides (MAPs) that undergo post-translational modifications (PTMs), particularly …

Studying the *O*-GlcNAcome of human placentas using banked tissue samples

S Luna, F Malard, M Pereckas, M Aoki, K Aoki… - …, 2024 - academic.oup.com

O-GlcNAcylation is a dynamic modulator of signaling pathways, equal in magnitude to the widely studied phosphorylation. With the rapid development of tools for its detection at the …

LncRNAlyzr: enrichment analysis for lncRNA sets

JE Evangelista, T Ali-Nasser, LE Malek, Z Xie… - Journal of Molecular …, 2025 - Elsevier

Abstract lncRNAs make up a large portion of the human genome affecting many biological processes in normal physiology and diseases. However, human lncRNAs are understudied …

Modernized uniform representation of carbohydrate molecules in the Protein Data Bank

C Shao, Z Feng, JD Westbrook, E Peisach… - …, 2021 - academic.oup.com

Abstract Since 1971, the Protein Data Bank (PDB) has served as the single global archive for experimentally determined 3D structures of biological macromolecules made freely …

Evolutionary conservation of human ketodeoxynonulosonic acid production is independent of sialoglycan biosynthesis

K Kawanishi, S Saha, S Diaz, M Vaill, A Sasmal… - The Journal of clinical …, 2021 - jci.org

Human metabolic incorporation of nonhuman sialic acid (Sia) N-glycolylneuraminic acid into endogenous glycans generates inflammation via preexisting antibodies, which likely …
