Functional implications of glycans and their curation: insights from the workshop held at...

Search within citing articles

Highlight key: Yellow = independent citation (no author overlap with the cited paper, and no PI or former PI authorship). Orange = needs manual review (author list could not be completed, so overlap is unverified). Faded = not independent: shares an author with the cited paper, or is authored by the PI or former PI.

O-GlcNAc informatics: advances and trends

C Hou, W Li, Y Li, J Ma - Analytical and Bioanalytical Chemistry, 2025 - Springer

As a post-translational modification, protein glycosylation is critical in health and disease. O-Linked β-N-acetylglucosamine (O-GlcNAc) modification (O-GlcNAcylation), as an …

Bridging worlds: connecting glycan representations with glycoinformatics via Universal Input and a canonicalized nomenclature

J Urban, R Joeres, D Bojar - Bioinformatics Advances, 2025 - academic.oup.com

Motivation As the field of glycobiology has developed, so too have different glycan nomenclature systems. While each system serves specific purposes, this multiplicity creates …

Characterization of HOL-30: a novel tandem-repeat galectin from the marine sponge Halichondria okadai

M Ohkawa, K Kamata, SMA Kawsar, M Gerdol, Y Fujii… - BBA Advances, 2025 - Elsevier

We here report the novel primary structure of a new member in the galectin family, the β-galactoside-binding lectin HOL-30, from the marine sponge Halichondria okadai, whose full …

Exploring protein glycosylation across GlyGen, UniProtKB, and related knowledgebases for data integration

J Vora, K Warner, P Vasudev, S Orchard, S Kulkarni… - Database, 2026 - academic.oup.com

Protein glycosylation plays a crucial role in cellular function, protein stability, and disease mechanisms, making the accurate annotation and integration of glycobiology data essential …

Updates to the Minimum Information Required for A Glycomics Experiment (MIRAGE) guidelines: Kettner and Zaia

C Kettner, J Zaia - Analytical and Bioanalytical Chemistry, 2026 - Springer

Glycosylation diversifies the structures and functions of proteins. In eukaryotes, biosynthetic enzymes of the secretory pathway produce heterogeneous glycosylation built on core …

Scalable Extraction and Curation of Glycan Biomarker Data From Biomedical Literature Using Large Language Models

CCHA Yeung - 2025 - search.proquest.com

Automated extraction and curation of glycan biomarker data from biomedical literature are crucial for synthesizing discrete findings into generalized glycan-disease associations. This …
