Factor XI and contact activation as targets for antithrombotic therapy

D Gailani, CE Bane, A Gruber - Journal of Thrombosis and …, 2015 - Wiley Online Library

The most commonly used anticoagulants produce therapeutic antithrombotic effects either by inhibiting thrombin or factor Xa (FXa) or by lowering the plasma levels of the precursors of …

Recent advances in the discovery and development of factor XI/XIa inhibitors

RA Al-Horani, DK Afosah - Medicinal research reviews, 2018 - Wiley Online Library

Abstract Factor XIa (FXIa) is a serine protease homodimer that belongs to the intrinsic coagulation pathway. FXIa primarily catalyzes factor IX activation to factor IXa, which …

Allosteric inhibition as a new mode of action for BAY 1213790, a neutralizing antibody targeting the activated form of coagulation factor XI

M Schaefer, A Buchmueller, F Dittmer… - Journal of molecular …, 2019 - Elsevier

Factor XI (FXI), the zymogen of activated FXI (FXIa), is an attractive target for novel anticoagulants because FXI inhibition offers the potential to reduce thrombosis risk while …

Factor XIa inhibitors in anticoagulation therapy: recent advances and perspectives

Z Xie, Z Meng, X Yang, Y Duan, Q Wang… - Journal of Medicinal …, 2023 - ACS Publications

Factor XIa (FXIa) in the intrinsic pathway of the coagulation process has been proven to be an effective and safe target for anticoagulant discovery with limited or no bleeding …

Designing smaller, synthetic, functional mimetics of sulfated glycosaminoglycans as allosteric modulators of coagulation factors

El Abdelfadiel, R Gunta, BK Villuri… - Journal of Medicinal …, 2023 - pmc.ncbi.nlm.nih.gov

Natural glycosaminoglycans (GAGs) are arguably the most diverse collection of natural products. Unfortunately, this bounty of structures remains untapped. Decades of research …

Selection and characterization of a DNA aptamer inhibiting coagulation factor XIa

DA Donkor, V Bhakta, LJ Eltringham-Smith… - Scientific Reports, 2017 - nature.com

Abstract Factor XIa (FXIa) is a serine protease that catalyzes the activation of Factor IX (FIX) in the blood coagulation cascade. FXIa and its precursor FXI are emergent therapeutic …

Factor XIa inhibitors as new anticoagulants

ML Quan, DJP Pinto, JM Smallheer… - Journal of Medicinal …, 2018 - ACS Publications

With the introduction of thrombin and factor Xa inhibitors to the oral anticoagulant market, significant improvements in both efficacy and safety have been achieved. Early clinical and …

One-Pot Transformation Strategy of *o*-Hydroxyphenyl Propargylamines for Modular Access to 3-Functionalized Benzofurans

M Wu, Y Liu, Y Kong, B Fei, Q Tang… - Advanced Synthesis & …, 2025 - Wiley Online Library

A one-pot strategy to C3-functioanlized benzofurans is achieved from o-hydroxyphenyl propargylamines (o-HPPAs). 3-Aminobenzofurans were obtained in 64–96% yields through …

First randomized evaluation of safety, pharmacodynamics, and pharmacokinetics of BAY 1831865, an antibody targeting coagulation factor XI and factor XIa, in …

B Nowotny, D Thomas, S Schwers… - … of Thrombosis and …, 2022 - Wiley Online Library

Background Bleeding is a clinically significant issue with all current anticoagulants. Safer antithrombotic strategies are required. Objectives To investigate the safety …

The discovery of a novel anticoagulant mechanism: factor XI activation inhibitors

K Ellsworth, P Nizner, A Ogawa, A Hruza… - ACS Pharmacology & …, 2025 - ACS Publications

Despite advances in anticoagulant drug discovery to establish a new standard of care, represented by Factor Xa (FXa) inhibitors, additional therapies are needed to address the …
