Advances in native cell membrane nanoparticles system

W Qiu, Y Guo - Current Opinion in Structural Biology, 2025 - Elsevier

The native cell membrane nanoparticles (NCMN) system utilizes membrane-active polymers specifically designed and optimized to extract and stabilize membrane proteins in the form of …

TSPO, reactive oxygen species and oxidative stress in physiological and pathological situations: a complex relationship

D Morin, JJ Lacapere - Biochimie, 2025 - Elsevier

Since its discovery in 1977 in the external membrane of mitochondria, the precise role of TSPO, previously named PBR for peripheral type benzodiazepine receptor, remains an …

Structure of an LGR dimer, an evolutionary predecessor of glycoprotein hormone receptors

Z Gong, S Chen, Z Fu, B Kloss, C Wang, J Kim… - Nature …, 2025 - nature.com

Glycoprotein hormones (GpHs) produced in the human pituitary act through receptors (GpHRs) in the gonads to support reproduction and in the thyroid for metabolism. GpHs are …

Loss of TSPOAP1 exacerbates mitochondrial dysfunction and neuronal apoptosis after intracerebral hemorrhage

Y Duan, C Li, Y He, M Zhang, H Gan, X Zhai - Cell Death & Disease, 2026 - nature.com

Intracerebral hemorrhage (ICH) induces severe secondary neuronal injury, in which mitochondrial dysfunction and apoptosis play central roles. Accumulating evidence suggests …

Human cellular models of the brain to study lipid homeostasis in Alzheimer's disease and related dementias

SE Heuer, FM Ahsan, TL Young-Pearse - Molecular Neurodegeneration, 2026 - Springer

Alzheimer's disease (AD) is a complex neurodegenerative disorder, and the leading cause of dementia worldwide, yet the availability of effective disease-modifying therapeutics …

TSPO: a conserved mitochondrial conduit linking cellular homeostasis to disease

A Rasheed, E Sidlauskaite, M Campanella - Cell Death & Disease, 2026 - nature.com

The translocator protein (TSPO) is an evolutionarily conserved 18 kDa protein localised to the outer mitochondrial membrane and increasingly recognised as a multifunctional …

Cholesterol-Mediated Dimerization of Mitochondrial Translocator Protein TSPO: Super-Resolution Microscopy and Molecular Dynamics Insights

C Ma, X Zang, S Qiao, H Wang, J Gao, Z Jiang - Langmuir, 2025 - ACS Publications

The translocator protein (TSPO) is a mitochondrial membrane protein that plays a critical role in cholesterol transport and steroid biosynthesis. While its functional significance is well …

TSPO deficiency uncovers a novel role for porphyrins in adipocyte lipid metabolism

CR Smith, LN Tu, PP Koganti… - Journal of …, 2026 - journals.bioscientifica.com

The translocator protein (TSPO) is a mitochondrial outer membrane protein enriched in lipid-metabolic tissues, including white adipose tissue (WAT), but its physiological role in …

TSPO safeguards porphyrin–iron balance under anoxic conditions in *Bacillus cereus*

C Duport, C Schmitt, J Armengaud - Msystems, 2026 - journals.asm.org

The physiological role of the bacterial translocator protein (TSPO) under anoxic conditions remains poorly defined. Here, we show that deletion of tspO in Bacillus cereus growing …

TSPO deficiency reveals a novel role for porphyrins in regulating white adipose tissue lipid metabolism

CR Smith, LN Tu, PP Koganti, V Selvaraj - bioRxiv, 2025 - biorxiv.org

The translocator protein (TSPO) is a mitochondrial outer membrane protein with high expression in cells specialized for lipid metabolism, including white adipose tissue (WAT) …
