METTL9 sustains vertebrate neural development primarily via non-catalytic functions

A Codino, L Spagnoletti, C Olobardi, A Cuomo… - Nature …, 2025 - nature.com

METTL9 is an enzyme catalysing N1-methylation of histidine residues (1MH) within eukaryotic proteins. Given its high expression in vertebrate nervous system and its potential …

A periodic table of monosaccharides

RD Cummings - Glycobiology, 2024 - academic.oup.com

It is important to recognize the great diversity of monosaccharides commonly encountered in animals, plants, and microbes, as well as to organize them in a visually interesting style that …

Glycosyltransferases: glycoengineers in human milk oligosaccharide synthesis and manufacturing

AS Slater, AG McDonald, RM Hickey… - Frontiers in Molecular …, 2025 - frontiersin.org

Human milk oligosaccharides (HMOs) are a diverse group of complex carbohydrates that play crucial roles in infant health, promoting a beneficial gut microbiota, modulating immune …

Recent advances in glycoinformatic platforms for glycomics and glycoproteomics

JL Abrahams, G Taherzadeh, G Jarvas… - Current opinion in …, 2020 - Elsevier

Highlights•Recent advancements in glycoinformatics tools to support analysis of glycan and glycopeptide data sets are summarised.•Review summarises the growth of machine …

Cell-specific bioorthogonal tagging of glycoproteins

A Cioce, B Calle, T Rizou, SC Lowery… - Nature …, 2022 - nature.com

Altered glycoprotein expression is an undisputed corollary of cancer development. Understanding these alterations is paramount but hampered by limitations underlying …

The Hitchhiker's guide to glycoproteomics

T Oliveira, M Thaysen-Andersen… - Biochemical Society …, 2021 - portlandpress.com

Protein glycosylation is one of the most common post-translational modifications that are essential for cell function across all domains of life. Changes in glycosylation are considered …

Correcting for sparsity and interdependence in glycomics by accounting for glycan biosynthesis

B Bao, BP Kellman, AWT Chiang, Y Zhang… - Nature …, 2021 - nature.com

Glycans are fundamental cellular building blocks, involved in many organismal functions. Advances in glycomics are elucidating the essential roles of glycans. Still, it remains …

Petagraph: A large-scale unifying knowledge graph framework for integrating biomolecular and biomedical data

BJ Stear, T Mohseni Ahooyi, JA Simmons, C Kollar… - Scientific data, 2024 - nature.com

Over the past decade, there has been substantial growth in both the quantity and complexity of available biomedical data. In order to more efficiently harness this extensive data and …

Analysis of carbohydrates and glycoconjugates by matrix-assisted laser desorption/ionization mass spectrometry: An update for 2017–2018

DJ Harvey - Mass Spectrometry Reviews, 2023 - Wiley Online Library

This review is the tenth update of the original article published in 1999 on the application of matrix-assisted laser desorption/ionization mass spectrometry (MALDI) mass spectrometry …

A review on the system-level bioactivity of polysaccharides along the structure–target–microbiome axis

H Ullah, S Huang, Q Pei, P Gui, H Shi, X Hu - International Journal of …, 2026 - Elsevier

AbstractPolysaccharides are structurally diverse biological macromolecules whose functional properties extend beyond simple structure–activity relationships. This review …
