A high-throughput microbial glycomics platform for prebiotic development

JL Modesto, SG Kabonick, JE Lausch, K Verma… - bioRxiv, 2025 - biorxiv.org

The intestinal glycome contains carbohydrates that govern the composition and metabolism of the gut microbiome. Gut microbes differentially access intestinal glycans as a nutrient …

Glycosylation as a Universal Regulator of Pathogenesis and Therapeutic Target in Multifactorial Human Diseases

V Ivchuk - 2026 - preprints.org

Glycosylation is a fundamental molecular mechanism that integrates immune regulation, oncogenesis, inflammation, and pathogen interaction. Despite significant progress in …

Identification of new targets for the diagnosis of cysts (four) and trophozoites (one) of the eye pathogen *Acanthamoeba*

BK Sundararaj, M Goyal, J Samuelson - bioRxiv, 2024 - biorxiv.org

Acanthamoebae, which are free-living amoebae, cause corneal inflammation (keratitis) and blindness, if not diagnosed and effectively treated. While trophozoites adhere to and …
