$B(C_6F_5)_3$-Catalyzed Decarboxylative Formation of Benzofurans via Intermolecular (3 + 2) Cyclization from Phenols

X Shu, Y He, W Guo - Organic Letters, 2025 - ACS Publications

We herein report unprecedented B (C6F5) 3 catalyzed intermolecular (3+ 2) cyclizations enabling versatile construction of benzofurans from readily available methylene cyclic …

Studies on fragment-based design of allosteric inhibitors of human factor XIa

RS Boothello, NV Sankaranarayanan… - Bioorganic & medicinal …, 2020 - Elsevier

Human factor XIa (hFXIa) has emerged as an attractive target for development of new anticoagulants that promise higher level of safety. Different strategies have been adopted so …

Inhibition of thrombin by functionalized C60 nanoparticles revealed via in vitro assays and in silico studies

Y Liu, J Fu, W Pan, Q Xue, X Liu, A Zhang - Journal of Environmental …, 2018 - Elsevier

The studies on the human toxicity of nanoparticles (NPs) are far behind the rapid development of engineered functionalized NPs. Fullerene has been widely used as drug …

Orally bioavailable amine-linked macrocyclic inhibitors of factor XIa

T Fang, JR Corte, PJ Gilligan, Y Jeon, H Osuna… - Bioorganic & Medicinal …, 2020 - Elsevier

The discovery of orally bioavailable FXIa inhibitors has been a challenge. Herein, we describe our efforts to address this challenge by optimization of our imidazole-based …

Allosteric Regulatory Mechanisms of Human DNA Methyltransferase 3A (DNMT3A)

EJ Ward - 2025 - search.proquest.com

DNA Methylation of cytosine to 5-methylcytosine (5mC) is a crucial epigenetic modification that plays a vital role in numerous biological processes, including cellular differentiation …
