Evidence of allosteric enzyme regulation via changes in conformational dynamics: a hydrogen/deuterium exchange investigation of dihydrodipicolinate synthase

MA Sowole, S Simpson, YV Skovpen, DRJ Palmer… - Biochemistry, 2016 - ACS Publications

Dihydrodipicolinate synthase is a tetrameric enzyme of the diaminopimelate pathway in bacteria and plants. The protein catalyzes the condensation of pyruvate (Pyr) and aspartate …

An Overview of Thrombin Inhibitors in the Perspective of Structureactivity Relationships

J Wang, X Sun, N Li, R Sheng… - Current Medicinal …, 2023 - benthamdirect.com

Thrombosis is one of the most important pathogenic factors related to cardiovascular diseases. Presently, thrombin inhibitors have gradually gained prominence in clinical …

Studies on fragment-based design of allosteric inhibitors of human factor XIa

RS Boothello, NV Sankaranarayanan… - Bioorganic & medicinal …, 2020 - Elsevier

Human factor XIa (hFXIa) has emerged as an attractive target for development of new anticoagulants that promise higher level of safety. Different strategies have been adopted so …

Revisiting the effect of cholesteryl sulfate on clotting and fibrinolysis: Inhibition of human thrombin and other human blood proteases

RA Al-Horani - Heliyon, 2024 - cell.com

Cholesteryl sulfate (CS) was quantitatively synthesized by microwave-assisted sulfonation of cholesterol followed by sodium exchange chromatography. In vitro effects of CS on human …
