Biochemistry and Stereochemistry of Anticoagulants

ID Tiuca - Anticoagulation Therapy, 2016 - intechopen.com

The spatial conformation of a molecule, in general, is closely connected to its interaction with the human body, meaning bioreceptors, metabolizing enzymes, transporting proteins, etc …

Incorporation of lignin in natural and synthetic biomaterials to alter mechanical and biochemical properties for enhanced wound healing

JA Belgodere - 2020 - repository.lsu.edu

It is estimated that chronic, non-healing wounds affect more than 6.5 million Americans annually, with an estimated healthcare cost beyond $14 billion. Here, we attempted to create …

Electrospinning of Lignin Nanofibers for Drug Delivery

SK Singh, A Singh, S Mishra - Electrospun Nanofibers: Fabrication …, 2021 - Springer

In a biorefinery process, a key component of lignocellulosic biomass, lignin can be recovered at lab-to-pilot scales by using numerous methods. Lignin can be utilized for …

Structural basis of different surface-modified fullerene derivatives as novel thrombin inhibitors: insight into the inhibitory mechanism through molecular modelling …

Z Yang, Y Wan, JE, Z Luo, S Guan, S Wang… - Molecular …, 2021 - Taylor & Francis

Thrombin is the main target of antithrombotic and anticoagulant therapy. Although recent studies have shown that surface-modified fullerene derivatives can be used as novel nano …

ASSESSING DRUG DEVELOPMENT PROPORTIES OF ANTITHROMBOTIC AND ANTI-CANCER AGENTS

EI Abdelfadiel - 2023 - scholarscompass.vcu.edu

The current GAG anticoagulants such as heparin, heparin derivatives, and vitamin K antagonists, such as warfarin continue to be the backbone of anticoagulant therapy. These …

Lignin as Bio-industrial Materials: Focused on Cosmetic Ingredients

HJ Shin - KSBB Journal - academia.edu

Abstract Lignin, which accounts for 15-35% of the wood components, is being obtained as a by-product in the industrial processes of pulp and in the production of cellulose fuels. It is …

Natural Excipients in Pharmaceutical

P Singh, G Mishra, SC Dinda - researchgate.net

Pharmaceutical excipients are the backbone of pharmaceutical formulations. These are inert substances added to contribute physicochemical stability in vitro as well as in vivo to the …

Future Medicinal Chemistry

AR Neves, M Correia-da-Silva, E Sousa, M Pinto - researchgate.net

Thrombosis is a complex process involving multiple pathways. Currently, therapy relies on the combination of two or more antithrombotic drugs, showing that inhibiting more than one …
