Pathophysiological significance and therapeutic applications of snake venom protease inhibitors

R Thakur, AK Mukherjee - Toxicon, 2017 - Elsevier

Protease inhibitors are important constituents of snake venom and play important roles in the pathophysiology of snakebite. Recently, research on snake venom protease inhibitors …

From In Silico De Novo Generation to In Vitro Functional Validation: Discovery of Multifunctional Antithrombotic Peptides from Food-Derived Proteins via a Hybrid …

H Xing, H Dong, C Guo, Y Zou, Z Wang… - Journal of Agricultural …, 2026 - ACS Publications

Cardiovascular thromboses bring heavy global health burdens, while traditional screening of food-derived antithrombotic peptides is inefficient. This work built an integrated pipeline …

Amaranth peptides with antithrombotic activity released by simulated gastrointestinal digestion

AC Sabbione, AE Nardo, MC Añón… - Journal of Functional …, 2016 - Elsevier

Amaranth protein isolate was obtained and subjected to simulated gastrointestinal digestion to evaluate its potential antithrombotic activity. The protein isolate did not present fibrin …

A new peptide (Ruviprase) purified from the venom of Daboia russelii russelii shows potent anticoagulant activity via non-enzymatic inhibition of thrombin and factor …

R Thakur, A Kumar, B Bose, D Panda, D Saikia… - Biochimie, 2014 - Elsevier

Compounds showing dual inhibition of thrombin and factor Xa (FXa) are the subject of great interest owing to their broader specificity for effective anticoagulation therapy against …

Novel furo [2, 3-d] pyrimidinones as direct thrombin inhibitors: Design, synthesis and biological evaluation

AN Khadse, HH Savsani, RV Chikhale, S Khan… - Bioorganic & Medicinal …, 2026 - Elsevier

Thrombin, a versatile protease is a promising target in coagulation cascade for thrombosis related conditions. We designed and synthesized thirty novel furo [2, 3-d] pyrimidone …

Self-assembled, bivalent aptamers on graphene oxide as an efficient anticoagulant

PX Lai, JY Mao, B Unnikrishnan, HW Chu… - Biomaterials …, 2018 - pubs.rsc.org

Graphene oxide (GO) has unique structural properties, can effectively adsorb single-strand DNA through π–π stacking, hydrogen bonding and hydrophobic interactions, and is useful in …

Antithrombotic activity of milk protein hydrolysates by lactic acid bacteria isolated from commercial fermented milks

E Pérez-Escalante, J Jaimez-Ordaz… - Brazilian Archives of …, 2018 - SciELO Brasil

In the last decade, thrombosis has been one of the pathologies with high incidence creating great concern in Health Institutes all around the world. Considering this, the aim of this …

Development of orally active thrombin inhibitors for the treatment of thrombotic disorder diseases

LW He, WC Dai, NG Li - Molecules, 2015 - pmc.ncbi.nlm.nih.gov

Thrombotic disorders represent the major share of the various cardiovascular diseases, and significant progress has been made in the development of synthetic thrombin inhibitors as …

Advances in the development of novel factor Xa inhibitors: a patent review

AN Khadse, MK Sharma, PR Murumkar… - Mini Reviews in …, 2018 - benthamdirect.com

Development of new anticoagulants has been in constant demand throughout the world due to increasing rate of morbidity and mortality caused by thrombotic diseases. Factor Xa (FXa) …
