Crystal structure of a human MUC16 SEA domain reveals insight into the nature of the CA125 tumor marker

B White, M Patterson, S Karnwal… - … Structure, Function, and …, 2022 - Wiley Online Library

MUC16 is a membrane bound glycoprotein involved in the progression and metastasis of pancreatic and ovarian cancer. The protein is shed into the serum and the resulting cancer …

Diminished sialoside binding in novel H5N1 influenza hemagglutinin variants identified in a human patient

JH Ni, S Malek Zadeh, AM Berezuk, R Lynam… - Nature …, 2026 - nature.com

In 2024, an adolescent female in British Columbia was hospitalised presenting with severe symptoms including respiratory failure due to infection with a novel H5N1 influenza strain …

A Zebrafish Galectin-1 Isoform Is Expressed in Skin and Gills and Binds to Bacteria, Bacterial Adhesin Receptors, and Epidermal Mucus Glycans

C Feng, K Abernathy, S Wang, G Zong… - International Journal of …, 2026 - mdpi.com

Galectins are a functionally diverse family of β-galactosyl-binding lectins that are ubiquitously present in animal species, with key roles in development and immune …

A Strategy to Achieve Sub-Parts-per-Million Mass Measurement Accuracy of *N*-Linked Glycans Using Infrared Matrix-Assisted Laser Desorption Electrospray …

AA Adepoju, TV Palomino, AL Sohn… - Journal of Mass …, 2025 - Wiley Online Library

Mass calibration techniques are vital in achieving high mass measurement accuracy (MMA) of large biomolecules. Variable ion populations that shift the axial frequencies due to space …

GlyCompute: towards the automated analysis of protein N-linked glycosylation kinetics via an open-source computational framework

K Flevaris, P Kotidis, C Kontoravdi - Analytical and Bioanalytical Chemistry, 2025 - Springer

Understanding the complex biosynthetic pathways of glycosylation is crucial for the expanding field of glycosciences. Computer-aided glycosylation analysis has greatly …

Three-dimensional structures of carbohydrates and where to find them

SI Scherbinina, PV Toukach - International journal of molecular sciences, 2020 - mdpi.com

Analysis and systematization of accumulated data on carbohydrate structural diversity is a subject of great interest for structural glycobiology. Despite being a challenging task …

A “proto” type galectin expressed in striped bass (*Morone saxatilis*) tissues is released to epidermal mucus and binds to bacterial and mucus glycans

DE Henrikson, H Ahmed, S Tasumi… - Frontiers in Cellular …, 2025 - frontiersin.org

Like all aquatic vertebrates and invertebrates, teleost fish are subject to the constant pressure of bacterial, fungal, and parasitic organisms present in the environmental interface …

Structural analysis of mammalian sialic acid esterase

D Ide, A Gorelik, K Illes, B Nagar - Journal of molecular biology, 2024 - Elsevier

Sialic acid esterase (SIAE) catalyzes the removal of O-acetyl groups from sialic acids found on cell surface glycoproteins to regulate cellular processes such as B cell receptor signalling …

Secreted filarial nematode galectins modulate host immune cells

HJ Loghry, NA Sondjaja, SJ Minkler… - Frontiers in …, 2022 - frontiersin.org

Lymphatic filariasis (LF) is a mosquito-borne disease caused by filarial nematodes including Brugia malayi. Over 860 million people worldwide are infected or at risk of infection in 72 …

Glycosylation and crowded membrane effects on influenza neuraminidase stability and dynamics

C Seitz, İ Deveci, JA McCammon - bioRxiv, 2023 - pmc.ncbi.nlm.nih.gov

All protein simulations are conducted with varying degrees of simplifications, oftentimes with unknown ramifications on how these simplifications affect the interpretability of the results. In …
