Mass spectrometry imaging of *N*-linked glycans: Fundamentals and recent advances

TV Palomino, DC Muddiman - Mass spectrometry reviews, 2026 - Wiley Online Library

With implications in several medical conditions, N-linked glycosylation is one of the most important posttranslation modifications present in all living organisms. Due to their …

Quantitative mapping of the in vivo O-GalNAc glycoproteome in mouse tissues identifies GalNAc-T2 O-glycosites in metabolic disorder

W Yang, E Tian, A Chernish, P McCluggage… - Proceedings of the …, 2023 - pnas.org

The family of GalNAc-Ts (GalNAcpolypeptide: N-Acetylgalactosaminyl transferases) catalyzes the first committed step in the synthesis of O-glycans, which is an abundant and …

GeneSetCart: assembling, augmenting, combining, visualizing, and analyzing gene sets

GB Marino, S Olaiya, JE Evangelista, DJB Clarke… - …, 2025 - academic.oup.com

Converting multiomics datasets into gene sets facilitates data integration that leads to knowledge discovery. Although there are tools developed to analyze gene sets, only a few …

Soluble human lectins at the host–microbe interface

AL Peiffer, AE Dugan… - Annual Review of …, 2024 - annualreviews.org

Human lectins are integral to maintaining microbial homeostasis on the skin, in the blood, and at mucosal barriers. These proteins can recognize microbial glycans and inform the host …

UniTmp: unified resources for transmembrane proteins

L Dobson, C Gerdán, S Tusnády… - Nucleic acids …, 2024 - academic.oup.com

Abstract The UNIfied database of TransMembrane Proteins (UniTmp) is a comprehensive and freely accessible resource of transmembrane protein structural information at different …

GeneRAIN: multifaceted representation of genes via deep learning of gene expression networks

Z Su, M Fang, A Smolnikov, ME Dinger, EC Oates… - Genome Biology, 2025 - Springer

We develop GeneRAIN, a suite of Transformer-based models that learn gene expression relationships from 410 K human bulk RNA-seq samples. Featuring a novel Binning-By-Gene …

ToolFactory: Automating tool generation by leveraging LLM to understand rest api documentations

X Ni, Q Wang, Y Zhang, P Hong - arXiv preprint arXiv:2501.16945, 2025 - arxiv.org

LLM-based tool agents offer natural language interfaces, enabling users to seamlessly interact with computing services. While REST APIs are valuable resources for building such …

Immunoglobulin G N-glycan biomarkers for autoimmune diseases: current state and a glycoinformatics perspective

K Flevaris, C Kontoravdi - International journal of molecular sciences, 2022 - mdpi.com

The effective treatment of autoimmune disorders can greatly benefit from disease-specific biomarkers that are functionally involved in immune system regulation and can be collected …

Glycoscience data content in the NCBI Glycans and PubChem

S Kim, J Zhang, T Cheng, Q Li, EE Bolton - Analytical and Bioanalytical …, 2025 - Springer

Studying glycans and their functions in the body aids in the understanding of disease mechanisms and developing new treatments. This necessitates resources that provide …

Glycosaminoglycan interaction networks and databases

S Ricard-Blum, S Perez - Current opinion in structural biology, 2022 - Elsevier

Glycosaminoglycans are complex polysaccharides exhibiting a large structural and conformational diversity. These key biological players organize the extracellular matrix …
