Sweet artificial intelligence as digital catalysts in infectious diseases: Glycomics and glycoanalysis

Y Gao, J Liu, B Gong, J Pei, X Zhuang, C Zeng… - Biosensors and …, 2026 - Elsevier

Glycans mediate microbial adhesion, host-cell entry, immune recognition and immune evasion, but their branching topology, linkage isomerism and context-dependent functions …

Artificial intelligence empowering polysaccharide research in drug development

J Yu, N Liu, H Xu, C Luo - Targetome, 2026 - journal.hep.com.cn

Polysaccharides, together with proteins and nucleic acids, are typically considered the three fundamental macromolecules essential for life. Unlike well-studied proteins and nucleic …

Tools for generating and analyzing glycan microarray data

AY Mehta, J Heimburg-Molinaro… - Beilstein journal of …, 2020 - beilstein-journals.org

Glycans are one of the major biological polymers found in the mammalian body. They play a vital role in a number of physiologic and pathologic conditions. Glycan microarrays allow a …

CarbArrayART: a new software tool for carbohydrate microarray data storage, processing, presentation, and reporting

Y Akune, S Arpinar, LM Silva, AS Palma… - …, 2022 - academic.oup.com

Glycan microarrays are essential tools in glycobiology and are being widely used for assignment of glycan ligands in diverse glycan recognition systems. We have developed a …

Decoding glycans: deciphering the sugary secrets to be coherent on the implication

S Sharma, S Shekhar, B Sharma, P Jain - RSC advances, 2020 - pubs.rsc.org

Neoteric techniques, skills, and methodological advances in glycobiology and glycochemistry have been instrumental in pertinent discoveries to pave way for a new era in …

CBMcarb-DB: interface of the three-dimensional landscape of carbohydrate-binding modules

DO Ribeiro, F Bonnardel, AS Palma, ALM Carvalho… - 2024 - books.rsc.org

Carbohydrate-binding-modules (CBMs) are discrete auxiliary protein modules with a non-catalytic carbohydrate-binding function and that exhibit a great diversity of binding …

Glycan analysis probes inspired by human lectins for investigating host-microbe crosstalk

S Ghosh, R Chorghade, RC Diehl, GJ Dodge, S Bae… - …, 2024 - pmc.ncbi.nlm.nih.gov

Human lectins are critical carbohydrate-binding proteins that recognize diverse glycoconjugates from microorganisms and can play a key role in host-microbe interactions …

Simple and practical sialoglycan encoding system reveals vast diversity in nature and identifies a universal sialoglycan-recognizing probe derived from AB_5 toxin B …

A Sasmal, N Khan, Z Khedri, BP Kellman… - …, 2022 - academic.oup.com

Vertebrate sialic acids (Sias) display much diversity in modifications, linkages, and underlying glycans. Slide microarrays allow high-throughput explorations of sialoglycan …

Bioinformatics study of lectins: new classification and prediction in genomes

F Bonnardel - 2021 - theses.hal.science

Bioinformatics uses mathematical concepts and informatics tools to unravel the knowledge hidden in biological data. When bioinformatics is applied to glycans and glycobiology, it is …

Automated identification of lectin fine specificities from glycan-array data

Z Klamer, B Haab - Glycan-Based Cellular Communication …, 2020 - ACS Publications

Lectins are proteins that mediate biological functions through the recognition and binding of specific oligosaccharides. Lectins also are widely used as probes to detect glycan ligands in …
