Molecular docking, linear and nonlinear QSAR studies on factor Xa inhibitors

M Ramandi, S Riahi, H Rahimi… - Structural Chemistry, 2020 - Springer

Abstract Factor Xa (FXa) enzyme has an important role in the blood coagulation system. Disruption in the enzyme function results in the production of blood clots. Therefore …

Design and synthesis of novel 3, 4-diaminobenzoyl derivatives as antithrombotic agents with improved solubility

G Liu, J Yang, B Su, R Liao, W Zhou, L Chen - Chemical Papers, 2019 - Springer

To obtain a highly selective, direct coagulation factor Xa (FXa) inhibitor with excellent antithrombotic activity and improved solubility, a series of novel 3, 4-diaminobenzoyl …

2-Aminobenzamide-Based Factor Xa Inhibitors with Novel Mono-and Bi-Aryls as S4 Binding Elements

NR Patel, DV Patel, AM Kanhed, SP Patel… - …, 2019 - Wiley Online Library

Factor Xa, a key serine protease in the coagulation cascade, has attracted a great deal of attention as a target for developing new antithrombotic agents. A series of novel alkyl …

A Novel Fragment Recommendation Workflow using Direct and Indirect Transfer of SAR According to Integrated Similarities of Scaffold Motifs and SAR Trends …

T Ishihara, K Mori, R Munakata… - Chem-Bio Informatics …, 2017 - jstage.jst.go.jp

Here we report a new drug design workflow that facilitates the transfer of structure-activity relationships (SARs) and recommends alternative fragments from SAR databases. We first …

Nucleophilic aromatic substitution of fluoroarenes to synthesise drug compounds for combatting neglected tropical diseases

A Buchanan - 2023 - repository.lboro.ac.uk

Using organofluorine molecules in medicinal chemistry has become commonplace in recent times, not just because of the effect of fluorine on pharmacokinetic and physiological …

Development of chemical probes for non-BET bromodomains

N Theodoulou - 2016 - stax.strath.ac.uk

This thesis describes the development and discovery of chemical probe molecules for non-BET bromodomains. Studies have demonstrated that inhibitors of the BET family of …

Discovery and Biophysical Characterization of Allosteric Inhibitors of Factor XIa (FXIa)

M Argade - 2012 - scholarscompass.vcu.edu

Thrombosis is one of the leading causes of mortality and morbidity that is associated with myocardial infarction, stroke and pulmonary embolism. Anti-thrombotic agents which intend …
