Potent inhibition of enterovirus D68 and human rhinoviruses by dipeptidyl aldehydes and α-ketoamides

Y Kim, ACG Kankanamalage, VC Damalanka… - Antiviral research, 2016 - Elsevier

Abstract Enterovirus D68 (EV-D68) is an emerging pathogen responsible for mild to severe respiratory infections that occur mostly in infants, children and teenagers. EV-D68, one of …

Discovery of allosteric modulators of factor XIa by targeting hydrophobic domains adjacent to its heparin-binding site

R Karuturi, RA Al-Horani, SC Mehta… - Journal of medicinal …, 2013 - pmc.ncbi.nlm.nih.gov

To discover promising sulfated allosteric modulators (SAMs) of glycosaminoglycan-binding proteins (GBPs), such as human factor XIa (FXIa), we screened a library of 26 synthetic …

Ligand binding to anion-binding exosites regulates conformational properties of thrombin

MV Malovichko, TM Sabo, MC Maurer - Journal of Biological Chemistry, 2013 - jbc.org

Thrombin participates in coagulation, anticoagulation, and initiation of platelet activation. To fulfill its diverse roles and maintain hemostasis, this serine protease is regulated via the …

Designing synthetic, sulfated glycosaminoglycan mimetics that are orally bioavailable and exhibiting in vivo anticancer activity

S Morla, O Ravikumar, C O'Hara… - Journal of Medicinal …, 2023 - pmc.ncbi.nlm.nih.gov

Sulfated glycosaminoglycans (GAGs), or synthetic mimetics thereof, are not favorably viewed as orally bioavailable drugs owing to their high number of anionic sulfate groups …

Sulfated non-saccharide glycosaminoglycan mimetics as novel drug discovery platform for various pathologies

DK Afosah, RA Al-Horani - Current medicinal chemistry, 2020 - benthamdirect.com

Glycosaminoglycans (GAGs) are very complex, natural anionic polysaccharides. They are polymers of repeating disaccharide units of uronic acid and hexosamine residues. Owing to …

Designing allosteric regulators of thrombin. Monosulfated benzofuran dimers selectively interact with Arg173 of exosite 2 to induce inhibition

MH Abdel Aziz, PS Sidhu, A Liang, JY Kim… - Journal of medicinal …, 2012 - ACS Publications

Earlier, we reported on the design of sulfated benzofuran dimers (SBDs) as allosteric inhibitors of thrombin (Sidhu et al. J. Med. Chem. 2011 54 5522–5531). To identify the site of …

Palladium-Catalyzed Cascade Reactions of 1-(3-Arylprop-2-ynyloxy)-2-bromo Benzene Derivatives with Organoboron Compounds

A Arcadi, F Blesi, S Cacchi, G Fabrizi… - The Journal of …, 2013 - ACS Publications

Applications of the cascade cyclocarbopalladation reaction followed by Suzuki–Miyaura coupling reactions of the readily available aryl-substituted propargylic aryl ethers with …

Pharmacological property optimization for allosteric ligands: A medicinal chemistry perspective

S Johnstone, JS Albert - Bioorganic & medicinal chemistry letters, 2017 - Elsevier

New strategies to potentially improve drug safety and efficacy emerge with allosteric programs. Biased allosteric modulators can be designed with high subtype selectivity and …

Allosteric inhibition of human factor XIa: discovery of monosulfated benzofurans as a class of promising inhibitors

MD Argade, AY Mehta, A Sarkar… - Journal of medicinal …, 2014 - pmc.ncbi.nlm.nih.gov

Factor XIa (fXIa) is being recognized as a prime target for developing safer anticoagulants. To discover synthetic, small, allosteric inhibitors of fXIa, we screened an in-house, unique …

Allosteric inhibition and kinetic characterization of Klebsiella pneumoniae CysE: An emerging drug target

D Verma, S Gupta, R Saxena, P Kaur… - International Journal of …, 2020 - Elsevier

The emergence and spread of multidrug-resistant strains of Klebsiella pneumoniae is a major concern that necessitates the development of unique therapeutics. The essential …
