A Novel C1q Domain-Containing Protein Isolated from the Mollusk *Modiolus kurilensis* Recognizing Glycans Enriched with Acidic Galactans and Mannans

AV Grinchenko, A Von Kriegsheim, NA Shved… - Marine drugs, 2021 - mdpi.com

C1q domain-containing (C1qDC) proteins are a group of biopolymers involved in immune response as pattern recognition receptors (PRRs) in a lectin-like manner. A new protein …

Neuroblastoma cell growth and invasiveness is modulated by the activity of N-acetylglucosaminyltransferase-III

AP Burch, MK Hall, RA Schwalbe - Plos one, 2026 - journals.plos.org

The presence of complex N-glycans with β1, 6-N-acetylglucosamine (GlcNAc) on cells has long been associated with cancer. For this reason, the role of N …

Limited N-glycan processing impacts chaperone expression patterns, cell growth and cell invasiveness in neuroblastoma

MK Hall, A Shajahan, AP Burch, CJ Hatchett, P Azadi… - Biology, 2023 - mdpi.com

Simple Summary The attachment of sugar residues to proteins is known as glycosylation. Glycosylation is a stepwise process which is significantly altered during cancer and may …

Functionalized N-hydroxypropyl trimethylammonium chloride chitosan as an ICG/DOX co-delivery nanocarriers for targeted and chemo-photothermal combination …

C Zhang, Z Jin, Y Lin, Y Wang, K Zhao - Journal of Drug Delivery Science …, 2023 - Elsevier

Doxorubicin (DOX) is considered one of the most effective chemotherapy drugs and is used as a first-line drug for many cancers. However, it has shown serious side effects such as …

N-glycan signatures of immunoglobulins-depleted serum proteins in colorectal cancer

H Lu, Y Liu, Y Wang, J Lin, L Cheng, X Liu, S Liu - Glycoconjugate Journal, 2026 - Springer

Protein glycosylation has been implicated in the pathogenesis of cancer, with colorectal cancer (CRC) strongly associated with serum N-glycosylation and IgG N-glycosylation …

Plasma ofCS-modified CD44 predicts the survival of patients with lung cancer

ZY Wu, DW Yang, YQ He, TM Wang, T Zhou… - Cancer …, 2024 - Wiley Online Library

Plasma levels of oncofetal chondroitin sulfate (ofCS)-modified CD44 have emerged as a promising biomarker for multi-cancer detection. Here, we explored its potential to predict the …

Cracking the glycome with the sweet tooth of nature: overview and outlook of lectin microarray technology

R Qin, LK Mahal - 2024 - books.rsc.org

Glycans are a group of ubiquitous biomolecules that play important roles in most, if not all, aspects of biology. 1, 2 Glycans function through various mechanisms, including altering …

Role of C-type lectins in the tumor microenvironment

K Ganguly, U Kishore, T Madan - Handbook of cancer and immunology, 2023 - Springer

C-type lectin receptors (CLRs) represent a broad and diversified family of pattern recognition receptors (PRRs) that are mainly expressed on the myeloid cells. They recognize the “non …

Methods and Materials for Studying Proteoglycans and Glycosaminoglycans

R Karlsson, MN Grønset, C Chuang, JA Hippensteel… - 2024 - books.rsc.org

Cellular processes in multi-cellular organisms depend on the interaction of biological molecules, which is driven by specific molecular recognition. Glycoproteins present on the …

N-Glycans as fundamental immune-checkpoints at the frontiers of inflammation, autoimmunity and cancer

CM Azevedo, B Santos-Pereira, E Leite-Gomes… - 2025 - books.rsc.org

Glycans cover the surface of essentially all cells, giving rise to the so-called glycocalyx. Glycans, and particularly N-glycans are key players in defining the fate and the nature of the …
