Low Levels of Natural Anti-α-*N*-Acetylgalactosamine (Tn) Antibodies Are Associated With COVID-19

A Breiman, N Ruvoën-Clouet, M Deleers… - Frontiers in …, 2021 - frontiersin.org

Human serum contains large amounts of anti-carbohydrate antibodies, some of which may recognize epitopes on viral glycans. Here, we tested the hypothesis that such antibodies …

Microarray-guided evaluation of the frequency, B-cell origins, and selectivity of human glycan-binding antibodies reveals new insights and novel antibodies

JS Temme, JA Crainic, LM Walker, W Yang… - Journal of Biological …, 2022 - jbc.org

The immune system produces a diverse collection of antiglycan antibodies that are critical for host defense. At present, however, we know very little about the binding properties …

Using Synthetic Glycans to Investigate Anti-Glycan Antibodies and Explore Their Medical Potential

F Weber, A Valenti, J Ledvinka… - Angewandte Chemie …, 2026 - Wiley Online Library

The dynamic glycan layer that surrounds human and microbial cells plays an essential role in the immune system's capacity to maintain immune tolerance and equilibrium, fight …

Point-of-care GlycoStrips detect serum and salivary antibodies to blood group antigens and pathogens

T Jia, AY Mehta, KM Charon, M Noel, P Singh… - Trends in …, 2026 - cell.com

Antibodies to carbohydrate antigens present in blood group substances and pathogens are important to human health, transplantation, and transfusion medicine. Identifying such …

Reusable glycan microarrays using a microwave assisted wet-erase (MAWE) process

AY Mehta, CA Tilton, L Muerner, S von Gunten… - …, 2024 - academic.oup.com

Modern studies on binding of proteins to glycans commonly involve the use of synthetic glycans and their derivatives in which a small amount of the material is covalently printed …

Multiplex analysis of ovarian cancer patients using glycan microarray

VS Pokrovsky, LA Qoura, AA Tikhonov, AY Rubina… - Analytical …, 2025 - Elsevier

Investigation of tumor-associated glycan antigens (TAGs) could be helpful for the development of sensitive cancer diagnostics and novel therapies. Glycan microarrays are …

Chemoenzymatic Synthesis of Rhamnolipid-Modified Exendin-4: A Dual Approach for Long-Acting Glycemic Control through Endogenous Antibody Recruitment and …

S Dai, H Liu, B Mi, Y Li, K Zhao, H Hong… - Journal of Medicinal …, 2025 - ACS Publications

Effective management of Type 2 diabetes requires therapies that balance potency with sustained action. Glycosylation of glucagon-based drugs improves stability and reduces …

Intravenous immunoglobulins promote an expansion of monocytic myeloid-derived suppressor cells (MDSC) in CVID patients

M Simon-Fuentes, S Sanchez-Ramon… - Journal of Clinical …, 2022 - Springer

Common variable immunodeficiency disorders (CVID), the most common primary immune deficiency, includes heterogeneous syndromes characterized by hypogammaglobulinemia …

Cancer cells and viruses share common glycoepitopes: Exciting opportunities toward combined treatments

R Roy - Frontiers in Immunology, 2024 - frontiersin.org

Aberrant glycosylation patterns of glycoproteins and glycolipids have long been recognized as one the major hallmarks of cancer cells that has led to numerous glycoconjugate vaccine …
