Hemoglobin: structure, function and allostery

MH Ahmed, MS Ghatge, MK Safo - Vertebrate and invertebrate respiratory …, 2020 - Springer

This chapter reviews how allosteric (heterotrophic) effectors and natural mutations impact hemoglobin (Hb) primary physiological function of oxygen binding and transport. First, an …

Generation and export of red blood cell ATP in health and disease

TJ McMahon, CC Darrow, BA Hoehn, H Zhu - Frontiers in physiology, 2021 - frontiersin.org

Metabolic homeostasis in animals depends critically on evolved mechanisms by which red blood cell (RBC) hemoglobin (Hb) senses oxygen (O2) need and responds accordingly. The …

π-hole interactions involving nitro compounds: directionality of nitrate esters

A Bauza, A Frontera, TJ Mooibroek - Crystal Growth & Design, 2016 - ACS Publications

The MEPs of a variety of nitro compounds (R–NO2) suggest the existence of a π-hole with a potential of up to+ 54 kcal/mol in 10 (R= CF3). Several of these nitro compounds were …

Nitric oxide binding geometry in heme-proteins: relevance for signal transduction

G De Simone, A di Masi, D Sbardella, P Ascenzi… - Antioxidants, 2024 - mdpi.com

Nitric oxide (NO) synthesis, signaling, and scavenging is associated to relevant physiological and pathological events. In all tissues and organs, NO levels and related …

Effect of Hb conformational changes on oxygen transport physiology

YIN Ziyue, LI Doudou, GUO Qianwen… - Journal of Central …, 2024 - pmc.ncbi.nlm.nih.gov

红细胞是人体内血液运输氧气最主要的媒介, 其功能主要是由血红蛋白 (hemoglobin, Hb) 的构象变化实现的. Hb 是由 4 个亚单位组成的四聚体, HbA 是健康成人中主要的 Hb, 以紧张态 …

π-Hole interactions with various nitro compounds relevant for medicine: DFT calculations and surveys of the Cambridge structural database (CSD) and the protein …

JM Hoffmann, AK Sadhoe, TJ Mooibroek - Synthesis, 2020 - thieme-connect.com

Model DFT computations and a thorough evaluation of the Cambridge structural database (CSD) and the protein data bank (PDB) were conducted to assess the occurrence and …

A novel role of acellular hemoglobin in hemolytic thrombosis

Y Wan, Y Wei, C Zhang, Y Liu, L Xu, C Gu, Z Yu… - Thrombosis …, 2023 - Elsevier

Background Hemolytic thrombosis has been associated with acellular hemoglobin released from damaged red blood cells during hemolysis. However, the precise molecular …

Application of nanodiamonds in Cu(II)-based rhodamine B probes for NO detection and cell imaging

B Liu, X Hu, J Chai, J Zhu, B Yang, Y Li - Journal of materials chemistry …, 2016 - pubs.rsc.org

Nitric oxide functions as an important signalling molecule in many biological systems. Nanodiamonds (NDs) have attracted enormous attention in the field of biomaterial science …

Design, synthesis, and investigation of novel nitric oxide (NO)-Releasing aromatic aldehydes as drug candidates for the treatment of sickle cell disease

B Huang, MS Ghatge, AK Donkor, FN Musayev… - Molecules, 2022 - mdpi.com

Sickle cell disease (SCD) is caused by a single-point mutation, and the ensuing deoxygenation-induced polymerization of sickle hemoglobin (HbS), and reduction in …
