Combating DC-SIGN-mediated SARS-CoV-2 dissemination by glycan-mimicking polymers

J Cramer, X Jiang, B Aliu, B Ernst - Archiv der Pharmazie, 2024 - Wiley Online Library

Many viruses exploit the human C-type lectin receptor dendritic cell-specific ICAM-3 grabbing nonintegrin (DC-SIGN) for cell entry and virus dissemination. An inhibition of DC …

Glycan epitopes and potential glycoside antagonists of DC-SIGN Involved in COVID-19: in silico study

M Gao, H Li, C Ye, K Chen, H Jiang, K Yu - Biomolecules, 2021 - mdpi.com

Glycosylation is an important post-translational modification that affects a wide variety of physiological functions. DC-SIGN (Dendritic Cell-Specific Intercellular adhesion molecule-3 …

Novel multifunctional glycan probes to elucidate specificities of diverse glycan recognition systems

J Yu, AC Decout, A Di Maio, W Chai, T Stehle… - bioRxiv, 2023 - biorxiv.org

Glycan microarrays of sequence-defined glycans are the most widely used approach for high-throughput studies of interactions of glycans with glycan binding proteins. Currently …

Structural Characterisation of Low Affinity Protein-Ligand Complexes of Biological Relevance by Novel STD NMR Approaches

J Ramírez Cárdenas - 2025 - idus.us.es

Protein-carbohydrate interactions are essential for numerous physiological and pathological processes, including host-pathogen recognition, immune modulation and microbial …

Advances in Native Mass Spectrometry Tools to Quantify Immune Lectin-Glycan Interactions

DT Bui - 2024 - ualberta.scholaris.ca

Glycans (oligosaccharides) are an important class of biomolecules essential to all living organisms. All cells are coated with a dense layer of glycoconjugates (glycan bearing …

CarboGrove: a resource of glycan-binding specificities through analyzed glycan-array datasets from all platforms

ZL Klamer, CM Harris, JM Beirne, JE Kelly, J Zhang… - bioRxiv, 2021 - biorxiv.org

The volume and value of glycan-array data are increasing, but no common method and resource exists to analyze, integrate, and use the available data. To meet this need, we …

Glycoproteomics and Immunity

SK Gautam - Functional Glycomics - api.taylorfrancis.com

Glycoproteomics, the mass study of glycosylated proteins, has come to be an essential discipline in immunology and has elucidated how glycan modifications regulate immune …

Protein Nanoparticles for Applications in Chemical Biology and Immunology

R Hincapie - 2022 - search.proquest.com

Virus-like particles are highly modular platforms with tailorable biodistribution, trafficking, and surface-display properties. The multivalent display of ligands or antigens on virus-like …
