4-1BB immunotherapy: advances and hurdles

R Singh, YH Kim, SJ Lee, HS Eom… - Experimental & Molecular …, 2024 - nature.com

Since its initial description 35 years ago as an inducible molecule expressed in cytotoxic and helper T cells, 4-1BB has emerged as a crucial receptor in T-cell-mediated immune …

Galectin-3: therapeutic targeting in liver disease

AC Mackinnon, D Tonev, B Jacoby… - Expert Opinion on …, 2023 - Taylor & Francis

Introduction The rising incidence of liver diseases is a worldwide healthcare concern. However, the therapeutic options to manage chronic inflammation and fibrosis, the …

Amyloid-β aggregates activate peripheral monocytes in mild cognitive impairment

K Juul-Madsen, P Parbo, R Ismail, PL Ovesen… - Nature …, 2024 - nature.com

The peripheral immune system is important in neurodegenerative diseases, both in protecting and inflaming the brain, but the underlying mechanisms remain elusive …

Gal-3 blocks the binding between PD-1 and pembrolizumab

SR Greisen, M Bendix, MA Nielsen… - Journal for …, 2024 - pmc.ncbi.nlm.nih.gov

Introduction Immune checkpoint inhibitors (ICI) have revolutionized the treatment of metastatic malignant melanoma (MM) and improved long-term survival. Despite the …

Profound connection between atherosclerosis and cancer: The role of galectin-3: A review

X Wang, B Xin, J Yang, X Hu, Y Wan - International Journal of Biological …, 2025 - Elsevier

Atherosclerosis (AS) and cancer are major chronic diseases that pose considerable threats to human health. AS and cancer share common risk factors and pathogenic mechanisms …

Disrupting galectin-3 and NET-mediated microglia-neutrophil cross-talk suppresses pathological retinal angiogenesis

Z Zhou, T Yuan, J Sun, C Tian, G Zhang… - Science Translational …, 2026 - science.org

Current research on pathological retinal neovascularization primarily focuses on growth factors, inflammation, and endothelial signaling pathways. However, increasing attention is …

Galectokines: the promiscuous relationship between galectins and cytokines

L Sanjurjo, EC Broekhuizen, RR Koenen… - Biomolecules, 2022 - mdpi.com

Galectins, a family of glycan-binding proteins, are well-known for their role in shaping the immune microenvironment. They can directly affect the activity and survival of different …

Lymphocyte activation gene 3 is increased and affects cytokine production in rheumatoid arthritis

JM Pedersen, AS Hansen, C Skejø… - Arthritis Research & …, 2023 - Springer

Background Lymphocyte activation gene-3 (LAG-3) inhibits T cell activation and interferes with the immune response by binding to MHC-II. As antigen presentation is central in …

Increased galectin-9 levels correlate with disease activity in patients with DMARD-naïve rheumatoid arthritis and modulate the secretion of MCP-1 and IL-6 …

MA Nielsen, D Køster, AY Mehta… - Cells, 2023 - mdpi.com

Background: Fibroblast-like synoviocytes (FLSs) are essential mediators in the expansive growth and invasiveness of rheumatoid synovitis, and patients with a fibroblastic-rich pauci …

Genetic variation at rs11574891 and rs3125003 in NOTCH1 is associated with therapeutic efficacy of Janus kinase inhibitors in Taiwanese patients with rheumatoid …

SW Lui, FC Liu, JF Lin, CJ Hsu, TY Hsieh… - International …, 2026 - Elsevier

Abstract Objectives Janus kinase inhibitors (JAKi) have been widely adopted in the treatment of rheumatoid arthritis (RA); however, inter-individual variability in therapeutic …
