Enrichment methods of N-linked glycopeptides from human serum or plasma: a mini-review

X Chao, B Zhang, S Yang, X Liu, J Zhang, X Zang… - Carbohydrate …, 2024 - Elsevier

Human diseases often correlate with changes in protein glycosylation, which can be observed in serum or plasma samples. N-glycosylation, the most common form, can provide …

Recent progress in high-throughput and automated characterization of N-glycans in monoclonal antibodies

AS Rathore, A Guttman, A Shrivastava… - TrAC Trends in Analytical …, 2023 - Elsevier

N-glycosylation of monoclonal antibody therapeutics is a post-translation modification and a critical quality attribute because of its significant impact on the bioavailability as well as the …

Transcriptome, glycome, and mucinome analysis reveal zinc is essential for the composition of mucus in the human goblet cell model HT-29-MTX

C Schüßler, N Chung, R Léonard, H Sprenger… - Scientific Reports, 2026 - nature.com

Zinc (Zn) deficiency affects approximately 1 billion people worldwide with severe consequences for their health, including increased intestinal infections, inflammation, and …

Loss of α2, 3-linked sialoside in the receptor-binding site of a H5N1 influenza hemagglutinin identified in a human patient

JH Ni, SM Zadeh, AM Berezuk, R Lynam… - bioRxiv, 2026 - biorxiv.org

In November 2024, an adolescent female in British Columbia was hospitalized presenting with severe symptoms including respiratory failure due to infection with a novel H5N1 …

Ablation of CD22 induces a pro-inflammatory transcriptome shift and endocytic deficits in M2-like macrophages

EN Kukan, GL Fabiano, JY Zhou, AR Richard… - …, 2025 - academic.oup.com

The interactions between environmental glycans and glycan-binding proteins modulate a host of processes across biological systems. The Siglec/sialic acid axis has gained …

Trispecific SEED antibodies engineered for neutrophil-mediated cell killing

V Natale, G Heves, K Stadlbauer, F Rüker, V Siegmund… - Mabs, 2025 - Taylor & Francis

Immunoglobulin (Ig) A has attracted interest as a proposed therapeutic agent due to its ability to engage cell groups differently compared to an IgG scaffold and elicit tumor …

Abnormal antibodies to self-carbohydrates in SARS-CoV-2-infected patients

DL Butler, L Imberti, V Quaresima, C Fiorini… - PNAS …, 2022 - academic.oup.com

Our immune system is critical for preventing and treating SARS-CoV-2 infections, but aberrant immune responses can have deleterious effects. While antibodies to glycans could …

Reusable glycan microarrays using a microwave assisted wet-erase (MAWE) process

AY Mehta, CA Tilton, L Muerner, S von Gunten… - …, 2024 - academic.oup.com

Modern studies on binding of proteins to glycans commonly involve the use of synthetic glycans and their derivatives in which a small amount of the material is covalently printed …

Structural basis of secreted acid phosphatase polymerization in the *Leishmania* parasite

P Bose, I Dahan, A Upcher, R Zalk… - Protein …, 2026 - Wiley Online Library

Enzymes that assemble into filaments typically transition between protomeric and polymeric states in response to cellular conditions. In contrast, the secreted acid phosphatase (SAP) of …

CSDB/SNFG structure editor: An online glycan builder with 2D and 3D structure visualization

AY Bochkov, PV Toukach - Journal of Chemical Information and …, 2021 - ACS Publications

This article describes features, usage, and application of an CSDB/SNFG Structure Editor, a new online tool for quick and intuitive input of carbohydrate and derivative structures using …
