Complex carbohydrates catabolism capacity of bladder microbiota inhabiting healthy and overactive female bladders.

JF Gourdine, IV Pacentine, A Barstad… - bioRxiv: the preprint …, 2025 - europepmc.org

Overactive bladder syndrome (OAB) is a poorly understood symptom complex that affects 40% of females over the age of 40, with clinical features including urinary urgency and …

Insights into biofilm architecture and maturation enable improved clinical strategies for exopolysaccharide-targeting therapeutics

JS Temme, Z Tan, M Li, M Yang, A Wlodawer… - Cell Chemical …, 2024 - cell.com

Polysaccharide intercellular adhesin (PIA), an exopolysaccharide composed of poly-N-acetyl glucosamine (PNAG), is an essential component in many pathogenic biofilms. Partial …

Engineering Functional CLA-Targeting CAR Approaches for Pancreatic Ductal Adenocarcinoma

C Dourlens, K Vanderliek, L Geiger, N Burzan… - bioRxiv, 2026 - biorxiv.org

Pancreatic cancer remains a highly lethal malignancy with limited therapeutic options. Chimeric antigen receptor (CAR) therapy has revolutionized the treatment of hematological …

How molecular modelling can better broaden the understanding of glycosylations

RM Rao, M Dauchez, S Baud - Current Opinion in Structural Biology, 2022 - Elsevier

Glycosylations are among the most ubiquitous post-translational modifications (PTMs) in proteins, and the effects of their perturbations are seen in various diseases such as cancers …

Highlighting the hygroscopic capacities of apiogalacturonans

L Verzeaux, R Rao, R Vyumvuhore, N Belloy… - Journal of Molecular …, 2023 - Elsevier

To meet the needs of dehydrated skin, molecules with a high hygroscopic potential are necessary to hydrate it effectively and durably. In this context, we were interested in pectins …

Towards a Better Understanding of the Influence of Carbohydrates on the Structural, Dynamic, and Functional Properties of Fibromodulin: Crucial Insights From a …

RM Rao, M Dauchez, S Baud - Proteoglycan Research, 2024 - Wiley Online Library

Proteoglycans are a class of biological macromolecules that are characterized by the presence of long chains of negatively charged glycosaminoglycans (GAGs). One family of …

Bioinformatics study of lectins: new classification and prediction in genomes

F Bonnardel - 2021 - theses.hal.science

Bioinformatics uses mathematical concepts and informatics tools to unravel the knowledge hidden in biological data. When bioinformatics is applied to glycans and glycobiology, it is …

Glycomics and Infection Progress: Exploring the Role of Mucuna pruriens (L.) Dc., in Modulating Host-Pathogen Interactions

P Prakash, B Deepan, N Ganesh, S Balaji… - Functional …, 2026 - api.taylorfrancis.com

Glycomics, the study of carbohydrates, has become crucial in understanding host-pathogen interactions. My chapter explored the complex relationship between glycosylation patterns …

Glycoinformatics: Advances in Glycan Data Integration and Analysis

SY Hsiung, A Zappa, Y Akune-Taylor… - Functional …, 2026 - api.taylorfrancis.com

Glycoinformatics originated with pioneering initiatives like CarbBank in the 1980s, which represented the first systematic digital repository for carbohydrate structures. Despite this …

Comprehensive synthesis of K48/K63 ubiquitin pentamers by graph-empowered automation

S Majima, E Kummelstedt, T Mikami, L Seidl, J Han… - 2025 - chemrxiv.org

Linear, branched, and heterotypic ubiquitin (Ub) chains regulate essential cellular processes, yet their structural and functional analysis remains limited by the difficulty of …
