Enzymatic blood group conversion of human kidneys for transplantation

S MacMillan - 2024 - repository.cam.ac.uk

ABO blood group antigens present an immunological barrier in transplantation, restricting organ donor-recipient matches to blood group compatible pairings only. Due to the chronic …

Towards Precision Glycotherapeutics Through Genome Editing and Next-Generation Glycoanlytics

H Li - 2025 - search.proquest.com

Glycosylation is crucial to many biological functions. Therefore, its control and monitoring are essential in many fields, from fundamental science to biotechnology and clinical …

The restricted nature of protein glycosylation in the mammalian brain

SE Williams, M Noel, S Lehoux, M Cetinbas, RJ Xavier… - bioRxiv, 2020 - biorxiv.org

Glycosylation is essential to brain development and function, though prior studies have often been limited to a single analytical technique. Using several methodologies, we analyzed …

Scalable Extraction and Curation of Glycan Biomarker Data From Biomedical Literature Using Large Language Models

CCHA Yeung - 2025 - search.proquest.com

Automated extraction and curation of glycan biomarker data from biomedical literature are crucial for synthesizing discrete findings into generalized glycan-disease associations. This …

Development of HDX-MS methods to further investigate complex protein samples

L Smith - 2024 - ora.ox.ac.uk

Hydrogen-Deuterium Exchange Mass Spectrometry (HDX-MS) has become an essential technique in biological research for investigating the dynamic structural changes in proteins …

N-glycan profiling of medulloblastoma in patients at different proteome subtypes of disease

B Peng - 2023 - ediss.sub.uni-hamburg.de

Medulloblastoma, the most prevalent malignant central nervous system tumor in pediatric patients, although associated with high survival rates, presents enduring side effects from …

Deciphering Receptor Binding Landscapes: AI-Enabled Insights Into Influenza Phenotype Prediction

L Borkenhagen - 2024 - search.proquest.com

As real-time surveillance efforts reveal the host range expansion of the H5 highly pathogenic avian influenza virus, the urgent need of methods for rapid viral characterization to identify …

Molecular and evolutionary bases of the biosynthesis of polysialylation: study of fish polysialyltransferases enzymatic specificities

M Decloquement - 2023 - theses.hal.science

In contrast to humans that generate only a single type of polymer consisting of α2, 8-linked N-acetylneuraminic acid polyNeu5Ac, fishes are able to generate a wide range of different …
