Systems biology-driven analysis of obesity-associated genes with transcript mapping and post-translational modification annotations

S Kulshrestha, P Narad - Biochemical and Biophysical Research …, 2026 - Elsevier

AbstractBackgroundMorbid obesity is impacted by several genetic variations, whose functional consequences often go unexamined at the protein level. Despite genome-wide …

Enhancing the interoperability of glycan data flow between ChEBI, PubChem and GlyGen

R Navelkar, G Owen, V Mutherkrishnan… - …, 2021 - academic.oup.com

Glycans play a vital role in health, disease, bioenergy, biomaterials and bio-therapeutics. As a result, there is keen interest to identify and increase glycan data in bioinformatics …

PWWP2A/B: Prominent players in the proteomic landscape

S Ponne, RK Chinnadurai, R Kumar, AK Mohanty… - Gene, 2025 - Elsevier

The PWWP domain is a conserved motif unique to eukaryotes, playing a critical role in various cellular processes. Proteins containing the PWWP domain are typically found in …

Computational study of the conformational ensemble of CX3C chemokine receptor 1 (CX3CR1) and its interactions with antagonist and agonist ligands

G Goode-Romero, L Dominguez - Journal of Molecular Graphics and …, 2022 - Elsevier

The CX3C chemokine receptor 1 (CX3CR1), a member of the class A of G Protein-Coupled Receptors (GPCR) superfamily, and its ligand fractalkine constitute an important …

Quantitative analysis of fucosylated glycoproteins by immobilized lectin-affinity fluorescent labeling

Z Gao, S Chen, J Du, Z Wu, W Ge, S Gao, Z Zhou… - RSC …, 2023 - pubs.rsc.org

Human biofluids are often used to discover disease-specific glycosylation, since abnormal changes in protein glycosylation can discern physiopathological states. Highly glycosylated …

A computational analysis of the glycoprotein LRP1 structure and the role of glycans as quaternary glue

GM Tuveri, M Basile, SA Gutiérrez, M Kausas, S Pujals… - bioRxiv, 2025 - biorxiv.org

The low-density lipoprotein receptor-related protein 1 (LRP1) plays a critical role in development and transport across the blood-brain barrier (BBB), yet until now, its molecular …

Glycan compositions with Glyconnect Compozitor to enhance glycopeptide identification

J Mariethoz, C Hayes, F Lisacek - Proteomics Data Analysis, 2021 - Springer

Glycoproteomics is unquestionably on the rise and its current development benefits from past experience in proteomics, in particular when attending to bioinformatics needs. An …

Application of bioanalytical and computational methods in decoding the roles of glycans in host-pathogen interactions

HT Le, M Liu, CL Grimes - Current Opinion in Chemical Biology, 2023 - Elsevier

Host-pathogen interactions (HPIs) are complex processes that require tight regulation. A common regulatory mechanism of HPIs is through glycans of either host cells or pathogens …

Deglycosylation of pathological specimens alters performance of diagnostic PDL1 antibodies

FF Dressler, DS Dabadghao, L Klapper, S Perner… - Virchows Archiv, 2022 - Springer

Immunohistochemical (IHC) predictive quantitation of PDL1 expression is obligatory in many cancer entities with improved response to immune checkpoint inhibition in PDL1-positive …

Carbohydrate structure database and other glycan databases as an important element of glycoinformatics

PV Toukach, AI Shirkovskaya - Russian Journal of Bioorganic Chemistry, 2022 - Springer

Carbohydrates are one of the most chemically diverse classes of biomolecules. The amount of accumulated information on carbohydrates is far beyond the level allowing navigation in …
