RCSB Protein Data bank: Tools for visualizing and understanding biological macromolecules in 3D

SK Burley, C Bhikadiya, C Bi, S Bittrich, H Chao… - Protein …, 2022 - Wiley Online Library

Now in its 52nd year of continuous operations, the Protein Data Bank (PDB) is the premiere open-access global archive housing three-dimensional (3D) biomolecular structure data. It …

Tools for mammalian glycoscience research

ME Griffin, LC Hsieh-Wilson - Cell, 2022 - cell.com

Cellular carbohydrates or glycans are critical mediators of biological function. Their remarkably diverse structures and varied activities present exciting opportunities for …

A guide to heat shock factors as multifunctional transcriptional regulators

HSE Hästbacka, AJ Da Silva, L Sistonen… - The FEBS …, 2025 - Wiley Online Library

The heat shock factors (HSFs) form a family of transcription factors, which are evolutionarily conserved in eukaryotes. They are best known as transcriptional regulators of molecular …

Post-translational modifications in metabolic reprogramming: implications for metabolic therapy and immunotherapy in cancer

SJ Chen, SW Yue, YP Zhang, HF Liang… - … and Targeted Therapy, 2026 - nature.com

Cancer metabolism is characterized by profound reprogramming, yet the mechanisms enabling rapid and precise adaptation remain incompletely understood. This review …

O-GlcNAcAtlas: A database of experimentally identified O-GlcNAc sites and proteins

J Ma, Y Li, C Hou, C Wu - Glycobiology, 2021 - academic.oup.com

O-linked β-N-acetylglucosamine (O-GlcNAc) is a post-translational modification (ie, O-GlcNAcylation) on the serine/threonine residues of proteins. As a unique intracellular …

Tools, tactics and objectives to interrogate cellular roles of O-GlcNAc in disease

C Fehl, JA Hanover - Nature chemical biology, 2022 - nature.com

The vast array of cell types of multicellular organisms must individually fine-tune their internal metabolism. One important metabolic and stress regulatory mechanism is the …

Recent advances in computational algorithms and software for large-scale glycoproteomics

DA Polasky, AI Nesvizhskii - Current Opinion in Chemical Biology, 2023 - Elsevier

Glycoproteomics, or characterizing glycosylation events at a proteome scale, has seen rapid advances in methods for analyzing glycopeptides by tandem mass spectrometry in recent …

Orthodox vs. Paradox: Supporting the central dogma with sugar code

W Cao, F Hu, Y Li, W Wang - Proteomics, 2026 - Wiley Online Library

The central dogma of molecular biology, traditionally focused on nucleic acids and proteins, has historically overlooked the crucial involvement of carbohydrates (sugars/glycans) in …

A universal spectrum annotator for complex peptidoforms in mass spectrometry-based proteomics

D Schulte, RW Leuvenink, S Jager… - Analytical …, 2025 - pmc.ncbi.nlm.nih.gov

Accurate and comprehensive peptide spectrum annotation is a crucial step to interpreting mass spectrometry-based proteomics data. While peak assignment in peptide fragmentation …
