Glycoinformatics in the artificial intelligence era

D Bojar, F Lisacek - Chemical Reviews, 2022 - pmc.ncbi.nlm.nih.gov

Artificial intelligence (AI) methods have been and are now being increasingly integrated in prediction software implemented in bioinformatics and its glycoscience branch known as …

Structure-based standardization of prebiotic soluble dietary fibers based on monosaccharide composition, degree of polymerization, and linkage composition

C Swackhamer, S Jang, BR Park, BR Hamaker… - Carbohydrate …, 2025 - Elsevier

Dietary fibers are diverse indigestible polysaccharides that can be categorized according to their physicochemical properties, including molecular size, monosaccharide composition …

Insights into glycobiology and the protein-glycan interactome using glycan microarray technologies

J Heimburg-Molinaro, AY Mehta, CA Tilton… - Molecular & Cellular …, 2024 - mcponline.org

Glycans linked to proteins and lipids and also occurring in free forms have many functions, and these are partly elicited through specific interactions with glycan-binding proteins …

GlyNet: a multi-task neural network for predicting protein–glycan interactions

EJ Carpenter, S Seth, N Yue, R Greiner, R Derda - Chemical science, 2022 - pubs.rsc.org

Advances in diagnostics, therapeutics, vaccines, transfusion, and organ transplantation build on a fundamental understanding of glycan–protein interactions. To aid this, we …

Databases and bioinformatic tools for glycobiology and glycoproteomics

X Li, Z Xu, X Hong, Y Zhang, X Zou - International Journal of Molecular …, 2020 - mdpi.com

Glycosylation plays critical roles in various biological processes and is closely related to diseases. Deciphering the glycocode in diverse cells and tissues offers opportunities to …

Glycosaminoglycan microarrays for studying glycosaminoglycan–protein systems

JE Chittum, A Thompson, UR Desai - Carbohydrate Polymers, 2024 - Elsevier

More than 3000 proteins are now known to bind to glycosaminoglycans (GAGs). Yet, GAG–protein systems are rather poorly understood in terms of selectivity of recognition, molecular …

Three-dimensional structures of carbohydrates and where to find them

SI Scherbinina, PV Toukach - International journal of molecular sciences, 2020 - mdpi.com

Analysis and systematization of accumulated data on carbohydrate structural diversity is a subject of great interest for structural glycobiology. Despite being a challenging task …

CarboGrove: a resource of glycan-binding specificities through analyzed glycan-array datasets from all platforms

ZL Klamer, CM Harris, JM Beirne, JE Kelly… - …, 2022 - academic.oup.com

Glycan arrays continue to be the primary resource for determining the glycan-binding specificity of proteins. The volume and diversity of glycan-array data are increasing, but no …

Tools for investigating host-microbe crosstalk using glycan analysis probes inspired by human lectins

S Ghosh, R Chorghade, RC Diehl, GJ Dodge… - …, 2025 - academic.oup.com

Human lectins are critical carbohydrate-binding proteins that recognize diverse glycoconjugates from microorganisms and can play a key role in host–microbe interactions …

Combined analysis of multiple glycan-array datasets: new explorations of protein-glycan interactions

Z Klamer, B Haab - Analytical chemistry, 2021 - pmc.ncbi.nlm.nih.gov

Glycan arrays are indispensable for learning about the specificities of glycan-binding proteins. Despite the abundance of available data, the current analysis methods do not have …
