Multifaceted roles of heparin and its derivatives in inflammation and cancer: Mechanisms, clinical applications, and future directions

X Zeng, Y Hou, L Luo, L Ren, Y Wang, X Jin… - International Journal of …, 2025 - Elsevier

Heparin and its derivatives have garnered increasing attention due to their multi-targeted anti-inflammatory and anti-cancer properties. This review systematically summarizes their …

Glycosaminoglycan microarrays for studying glycosaminoglycan–protein systems

JE Chittum, A Thompson, UR Desai - Carbohydrate Polymers, 2024 - Elsevier

More than 3000 proteins are now known to bind to glycosaminoglycans (GAGs). Yet, GAG–protein systems are rather poorly understood in terms of selectivity of recognition, molecular …

Unraveling the Potential of Small Molecule Heparin Glycomimetics in Neuroregenerative Therapeutics

M Özkan, G Cellot, S Pawar, D Sardana… - Journal of the …, 2025 - ACS Publications

Heparin and heparan sulfate (HS) glycosaminoglycans (GAGs) are essential regulators of neurotrophic signaling. However, their therapeutic applications are hindered by structural …

Natural and Semisynthetic Hydrocolloids as Functional Polymeric Materials: Structure–Function Relationships and Emerging Applications

CSGP Pereira, M Carpena, JCM Barreira… - Applied Sciences, 2026 - mdpi.com

Hydrocolloids comprise a diverse class of high-molecular-weight polymeric carbohydrates associated with a wide range of physicochemical and functional properties. This review …

Rational design and expedient synthesis of heparan sulfate mimetics from natural aminoglycosides for structure and activity relationship studies

J Wakpal, V Pathiranage, AR Walker… - Angewandte Chemie …, 2023 - Wiley Online Library

Heparan sulfate (HS) contains variably repeating disaccharide units organized into high- and low-sulfated domains. This rich structural diversity enables HS to interact with many …

Synthetic Heparan Sulfate-like Oligosaccharides as Tools to Decipher Growth Factor Recognition

J Wakpal, K Singh, M Hotor, L Philip… - Journal of Medicinal …, 2026 - ACS Publications

Heparan sulfate proteoglycans (HSPGs) facilitate interactions between growth factors and their receptors, regulating signaling pathways involved in angiogenesis and cell …

Chemical Strategies for Controlling Sulfation in Biomacromolecules

C Liu, X Liu, Y Deng, J Niu - ACS chemical biology, 2026 - pmc.ncbi.nlm.nih.gov

Sulfation is a fundamental post-translational modification that imparts negative charge and structural complexity to biomolecules, thereby regulating molecular recognition, signaling …

Carbon-modified sugars: from natural products to glycomimetics

S Demirovic, N Swift, M Peczuh - Organic & Biomolecular Chemistry, 2026 - pubs.rsc.org

Bacteria take prototypical aldohexopyranoses and remodel them into more elaborate sugars that provide them advantages in competitive environments. The attachment of alkyl or acyl …

How pH and Sulfation Shape human Heparanase Structure, Stability, and Substrate Recognition

A Pennacchio, Y Aristizabal, J Oñate-Garzón… - Archives of Biochemistry …, 2026 - Elsevier

Human heparanase (HPSE) is an endo-β-D-glucuronidase involved in the degradation of heparan sulfate and in several physiopathological processes, including inflammation …

Synthesis of Sulfated Glycomimetics with Micromolar Affinity for Midkine

R Pereira-Jaramillo, JL de Paz… - The Journal of Organic …, 2026 - pmc.ncbi.nlm.nih.gov

A series of sulfated oligosaccharides (one tetra-and ten disaccharides) have been synthesized to study their interactions with midkine, a heparin-binding growth factor involved …
