The universe of galectin-binding partners and their functions in health and disease

MF Troncoso, MT Elola, AG Blidner, L Sarrias… - Journal of Biological …, 2023 - jbc.org

Galectins, a family of evolutionarily conserved glycan-binding proteins, play key roles in diverse biological processes including tissue repair, adipogenesis, immune cell …

Novel biomarkers in RA: Implication for diagnosis, prognosis, and personalised treatment

M Neto, B Mendes, F Albuquerque… - Best Practice & Research …, 2025 - Elsevier

Over the past decades our understanding of rheumatoid arthritis (RA) pathogenesis has improved remarkably and major breakthroughs in the treatment of RA were made with the …

Differential expression of galectin-1 and galectin-9 in immune-mediated inflammatory diseases

C Valero-Martínez, M Pardines-Ortiz, N Montes… - International Journal of …, 2025 - mdpi.com

Galectin-1 and-9 (Gal1/9) are essential mediators of immune-inflammatory responses, which makes these proteins potential biomarkers for immune-mediated diseases (IMIDs), such as …

Galectin-9 as an indicator of functional limitations and radiographic joint damage in patients with rheumatoid arthritis

J Guo, X Ai, B Jia, X Zhong, L Liu, Q Hu, J Xie… - Frontiers in …, 2024 - frontiersin.org

Background Previous studies have revealed that Galectin-9 (Gal-9) acts as an apoptosis modulator in autoimmunity and rheumatic inflammation. In the present study, we …

Knockdown of Galectin-9 alleviates rheumatoid arthritis through suppressing TNF-α-induced activation of fibroblast-like synoviocytes

Q Jia, Q Che, X Zhang, J Chen, C Ren, Y Wu… - Biochemical …, 2024 - Elsevier

Abstract The role of Galectin-9 (Gal-9) in the pathogenesis of rheumatoid arthritis (RA) remains unclear. This study aimed to investigate the mechanism of action and therapeutic …

Gastrodin targets the system Xc-/GPX4 axis to inhibit abnormal proliferation of fibroblast-like synoviocytes and improve rheumatoid arthritis

Y Li, A Li, Y Xing, Y Jiang, H Pei, Z He, J Li, Y Zhao… - Phytomedicine, 2025 - Elsevier

Abstract Background Rheumatoid Arthritis (RA) is a chronic autoimmune disease characterized by the abnormal proliferation of Fibroblast-like Synoviocytes (FLS), leading to …

Extracellular vesicle–mediated immunomodulation and targeted delivery: breakthroughs and challenges in rheumatoid arthritis therapy

B Yang, H Yan, Y Zhou, J Li, J Liu, C Huang… - Frontiers in …, 2026 - frontiersin.org

Rheumatoid arthritis (RA) is a chronic autoimmune disorder characterized by persistent synovitis, immune dysregulation, and progressive joint destruction. Its pathogenesis is …

Sugar-coded signals: Glycan-based biomarkers in rheumatoid arthritis

M Hires, S Hroncekova, V Dujnič… - Molecular & Cellular …, 2026 - mcponline.org

This review paper summarizes the pathophysiology of rheumatoid arthritis (RA), its incidence and etiology, and conventional RA protein-based biomarkers. A brief overview of …

Methanol Extract from *Ranunculus repens* L. Down-Regulated Galectins 4 and 9, and Mitigated Chronic Pancreatitis in an Experimental Rat Model

A Khenchil, H Rechreche, A Abbes, E Pettineo… - Antioxidants, 2025 - mdpi.com

Chronic pancreatitis (CP) is a progressive fibro-inflammatory disease in which oxidative stress (OS) promotes pancreatic stellate cells activation and fibrosis. Ranunculus repens …

Gentiopicroside attenuates lupus arthritis by targeting galectin-mediated macrophage activation

Y Gan, S Zhou, K Lin, Y Bai, J Liu, M Jin, S Huang… - Phytomedicine, 2026 - Elsevier

Background Inflammatory arthritis represents a common and clinically challenging manifestation of systemic lupus erythematosus (SLE), with current therapeutic options often …
