Transmembrane lectins in cancer immunity: emerging drivers of myeloid-mediated immunosuppression

G Trindade, AS Palma, C Brito - Frontiers in Immunology, 2026 - frontiersin.org

Immune evasion in cancer is sustained by coordinated interactions between malignant, stromal, and immune cells within the tumor microenvironment. Among these, myeloid …

Exploring the extracellular matrix: Engineering native glycosaminoglycans to modulate host responses

J Uribe-Gomez, PP Farina, P Srinath, L Russo… - Cell Biomaterials, 2025 - cell.com

The extracellular matrix (ECM) is composed of a group of naturally derived biomacromolecules and soluble factors refined from harvested tissues and organs, with …

An Automation Platform for the Chemoenzymatic Synthesis of Complex Sulfated and Branched Glycans

S Chakraborty, K Minder, AR Prudden… - Journal of the …, 2026 - pmc.ncbi.nlm.nih.gov

Diverse collections of well-defined glycans are needed to investigate the molecular mechanisms by which these biomolecules mediate biological and disease processes …

Scalable enzymatic synthesis of free-reducing human milk oligosaccharides via a β-galactosidase-resistant tagging strategy

MT Lin, CE You, YT Huang, CC Yu - ACS Sustainable Chemistry …, 2026 - ACS Publications

Free-reducing end glycans are essential tools in glycan–protein interaction studies, structural biology, and functional glycomics, owing to their native conformational flexibility …

Novel click coupling chemistry to explore glycan recognition

T Jia, AY Mehta, CA Tilton, EKC Tulin… - ACS Central …, 2025 - pmc.ncbi.nlm.nih.gov

Specific recognition of glycans by proteins is important in many biological processes and immune responses. Here we present a general approach for derivatizing free glycans with a …

Polymer-tethered glycosylated gold nanoparticles as versatile tools for bio-sensing

SJ Richards, MI Gibson - Chemical Communications, 2026 - pubs.rsc.org

Glycans direct many biological recognition and signalling processes, spanning basic cell biology to diagnostics and therapy. Multivalent presentation of glycans is well established to …

Quantifying protein–glycan interactions using native mass spectrometry

DT Bui, EN Kitova, L Han, LK Mahal… - Mass Spectrometry …, 2026 - Wiley Online Library

Interactions between glycan-binding proteins (GBPs) and carbohydrates (glycans) are essential to many biological processes relevant to human health and disease. For most …

Immune implications and therapeutic opportunities of tumor glycosylation

R Hatinguais, S Verjans, J Gomes, SJ van Vliet - Nature Cancer, 2026 - nature.com

Aberrant glycosylation is a nearly universal hallmark of cancer cells. Tumor-associated glycans can reshape cancer cell biology and act as crucial suppressors of anti-tumor …

Glycoproteins, glycolipids, or both: why do glycosyltransferases recognize different acceptors?

K Mikolajczyk, M Czerwinski, R Kaczmarek - ChemBioChem, 2025 - Wiley Online Library

Glycosylation is an important post-translational modification catalyzed by glycosyltransferases (GTs), which comprise a large group of enzymes with diversified …

A Zebrafish Galectin-1 Isoform Is Expressed in Skin and Gills and Binds to Bacteria, Bacterial Adhesin Receptors, and Epidermal Mucus Glycans

C Feng, K Abernathy, S Wang, G Zong… - International Journal of …, 2026 - mdpi.com

Galectins are a functionally diverse family of β-galactosyl-binding lectins that are ubiquitously present in animal species, with key roles in development and immune …
