Advances in the treatment of atherosclerosis with ligand-modified nanocarriers

X Deng, J Wang, S Yu, S Tan, T Yu, Q Xu, N Chen… - …, 2024 - Wiley Online Library

Atherosclerosis, a chronic disease associated with metabolism, poses a significant risk to human well-being. Currently, existing treatments for atherosclerosis lack sufficient efficiency …

Unraveling the glyco-immunity nexus in pancreatic cancer

C Rajesh, RD Cummings, P Radhakrishnan - Molecular Cancer, 2025 - Springer

Pancreatic ductal adenocarcinoma (PDAC) is an extremely aggressive disease, and standard of care therapies have failed to yield significant clinical benefit, with invasive …

Reading and writing the human glycocode

N de Haan, MI Nielsen… - Annual Review of …, 2024 - annualreviews.org

The complex carbohydrate structures decorating human proteins and lipids, also called glycans, are abundantly present at cell surfaces and in the secretome. Glycosylation is vital …

Biological function, regulatory mechanism, and clinical application of mannose in cancer

H Jin, X Liu, H Liu - Biochimica et Biophysica Acta (BBA)-Reviews on …, 2023 - Elsevier

Studies examining the regulatory roles and clinical applications of monosaccharides other than glucose in cancer have been neglected. Mannose, a common type of monosaccharide …

Subcellular glycan-mannose receptor binding kinetics correlate with myeloid cell function

K Steuten, JJA Bakker, W Doelman… - Nature …, 2025 - nature.com

Extracting single-molecule lectin binding kinetics from primary cells has not been possible to date. Here, we present Glyco-PAINT-APP (Automated Processing Pipeline), an automated …

Metabolism-driven glycosylation represents therapeutic opportunities in interstitial lung diseases

K Drzewicka, Z Zasłona - Frontiers in Immunology, 2024 - frontiersin.org

Metabolic changes are coupled with alteration in protein glycosylation. In this review, we will focus on macrophages that are pivotal in the pathogenesis of pulmonary fibrosis and …

Analysis of *N*- and *O*-linked site-specific glycosylation by ion mobility mass spectrometry: State of the art and future directions

M Girgis, G Petruncio, P Russo, S Peyton, M Paige… - …, 2024 - Wiley Online Library

Glycosylation, the major post-translational modification of proteins, significantly increases the diversity of proteoforms. Glycans are involved in a variety of pivotal structural and …

Neu1 deficiency and fibrotic lymph node microenvironment lead to imbalance in M1/M2 macrophage polarization

E Escalona, A Olate-Briones… - Frontiers in …, 2024 - frontiersin.org

Macrophages play a pivotal role in tissue homeostasis, pathogen defense, and inflammation resolution. M1 and M2 macrophage phenotypes represent two faces in a spectrum of …

Activation of mannose receptor C type 1 in macrophages improves renal fibrosis through mediating fibronectin endocytosis

L Long, M Li, M Wang, B Liang, M Huang, X Yuan… - Life Sciences, 2025 - Elsevier

Aims Excess extracellular matrix (ECM) deposition is the characteristic of renal fibrosis, owing to the imbalance between synthesis and degradation. Fibronectin could regulate the …

Fluorescent probes for intraoperative navigation in glioma resection: recent advances and perspectives

Y Zhang, P Wei, D Yan, Z Li, P Li - Coordination Chemistry Reviews, 2026 - Elsevier

Gliomas comprise a heterogeneous group of primary central nervous system tumors, ranging from lower-grade diffuse gliomas to highly aggressive high-grade gliomas, with …
