Labeling approaches for in vivo tracing of glycans: From labeling strategies to application advantages

C Li, Z Zheng, J Liu, H Qin, S Li, Z Chen, Z He… - Glycoscience & …, 2026 - Elsevier

While glycans perform essential biological roles, tracking them in vivo remains challenging due to structural complexity and lack of inherent detectable signals. Fluorescent probes and …

Point-of-care GlycoStrips detect serum and salivary antibodies to blood group antigens and pathogens

T Jia, AY Mehta, KM Charon, M Noel, P Singh… - Trends in …, 2026 - cell.com

Antibodies to carbohydrate antigens present in blood group substances and pathogens are important to human health, transplantation, and transfusion medicine. Identifying such …

Blood group O expression in normal tissues and tumors

EKC Tulin, L Muerner, TR McKitrick, CA Tilton… - The FEBS …, 2025 - Wiley Online Library

The H antigen (O blood group), the precursor to A and B blood groups, is expressed on human erythrocytes and other cells (eg, endothelial cells). Remarkably, the specific …

Design and synthesis of novel fucosylated chondroitin sulfate derivatives as intrinsic FXase inhibitors and evaluation of their antithrombotic activities

D Xu, X Gong, L Lin, H Dong, Y Wen, Y Li, G Fu… - Carbohydrate …, 2025 - Elsevier

Thrombotic disease is one of the most serious threats to human health, underscoring the urgent need for novel anticoagulants. Fucosylated chondroitin sulfate (FuCS) …

Development of lamprey-derived antibodies against human blood group antigens

PB Kunz, EKC Tulin, AY Mehta, T Jia… - …, 2025 - academic.oup.com

A major challenge in the glycosciences is the scarcity of sensitive and specific glycan-binding reagents, such as monoclonal antibodies, for detecting and isolating glycans. Here …

A trifunctional probe for generation of fluorogenic glycan-photocrosslinker conjugates

B Vreulz, D De Crozals, S Cecioni - RSC chemical biology, 2025 - pubs.rsc.org

Interactions between cell surface glycans and lectins mediate vital biological processes, yet their characterization is hindered by the low affinity of these binding events. While …

Dynamics of Anti-ABO (H) Antibody Expression in SARS-CoV-2-Infected Patients

T Jia, AY Mehta, KR Patel, KM Charon… - ACS Chemical …, 2026 - ACS Publications

The association between ABO (H) blood groups and COVID-19 susceptibility and severity has been studied throughout the pandemic. However, the comprehensively tracked dynamic …

Establishing “Glycoantigens” as a cross-field concept in Glycobiology, transfusion, transplant, and immunology

WJ Lane - Human Immunology, 2026 - Elsevier

Cell-surface glycans (carbohydrate structures) serve as critical antigens in transfusion and transplantation, yet their study remains fragmented across disciplines. The ABO blood group …

Use of Microbial Microarrays to Define Antibody Specificity

CJ Stowell, V Ortiz, CL Cepeda, VC Lee… - Methods in Transfusion …, 2026 - Springer

The formation of alloantibodies against red blood cell (RBC) antigens is the most frequent immune barrier to blood transfusion. Among these antibodies, those that occur naturally …
