Chemokine binding to PSGL-1 is controlled by O-glycosylation and tyrosine sulfation

CK Goth, AY Mehta, AM McQuillan, KJ Baker… - Cell chemical …, 2023 - cell.com

Protein glycosylation influences cellular recognition and regulates protein interactions, but how glycosylation functions alongside other common posttranslational modifications (PTMs) …

Stirring glycopeptides away from the constraints of solid-phase synthesis misconceptions

D Ben Abba Amiel, C Gilon, M Hurevich - Frontiers in Molecular …, 2026 - frontiersin.org

Glycosylation is one of the most prevalent post-translational modifications of proteins. Synthetic glycopeptides give access to protein fragments with well-defined glycosylation …

Expeditious synthesis of a glycopeptide library

D Ben Abba Amiel, M Hurevich - European Journal of Organic …, 2022 - Wiley Online Library

Short proteoglycan fragments are of great importance for biochemical research. The solid-phase synthesis of such glycopeptides relies on excessive use of glycosylated amino acids …

VaporSPOT: Parallel synthesis of oligosaccharides on membranes

A Tsouka, P Dallabernardina, M Mende… - Journal of the …, 2022 - ACS Publications

Automated chemical synthesis has revolutionized synthetic access to biopolymers in terms of simplicity and speed. While automated oligosaccharide synthesis has become faster and …

A Versatile Urea Type Linker for Functionalizing Natural Glycans and Its Validation in Glycan Arrays

S Serna, R Artschwager… - … A European Journal, 2023 - Wiley Online Library

The isolation from organisms and readily available glycoproteins has become an increasingly convenient source of N-glycans for multiple applications including glycan …

Parallel Synthesis of Glycopeptide Libraries Using Glyco-SPOT Synthesis

AY Mehta, J Heimburg-Molinaro… - … Libraries: Methods and …, 2025 - Springer

Synthesis of glycopeptide libraries is often limited by the cost and availability of the glycoamino acids. To circumvent this, we have devised a method of using SPOT synthesis …

CRISPR-Cas9-mediated depletion of *O*-GlcNAc hydrolase and transferase for functional dissection of *O*-GlcNAcylation in human cells

A Gorelik, AT Ferenbach - bioRxiv, 2020 - biorxiv.org

O-GlcNAcylation is an abundant post-translational modification (PTM) on serine and threonine residues of nuclear and cytoplasmic proteins. Although this PTM has been …

Electrochemical Desulfurization and its Application to Native Chemical Ligation

CMG Lamb - 2024 - discovery.ucl.ac.uk

Native chemical ligation (NCL), a synthetic technique where two peptide fragments are linked using the thiol chemistry of the cysteine side chain, has rapidly proved itself to be the …

基因编辑技术及其在糖生物学研究中的应用.

章恩华, 邱宏 - Chinese Journal of Biochemistry & Molecular …, 2024 - openurl.ebsco.com

摘要基因功能的解析是现代生物学研究的基本问题, 基因的精准, 高效和靶向编辑是基因功能研究不可或缺的手段. 在过去的30 多年, 基因编辑实现了从基于同源重组修复技术的基因打靶 …

Peptide microarray fabrication by laser-based in situ synthesis and utilization for infectious disease research

J Heidepriem - 2022 - search.proquest.com

Due to the circulation of infectious diseases and the emergence of new pathogens, fundamental research, as well as the development of vaccines are of utmost importance …
