Contemporary developments in the discovery of selective factor Xa inhibitors: A review

NR Patel, DV Patel, PR Murumkar, MR Yadav - European journal of …, 2016 - Elsevier

Thrombosis is a leading cause of death in cardiovascular diseases such as myocardial infarction (MI), unstable angina and acute coronary syndrome (ACS) in the industrialized …

Acceptance and kinetic resolution of α-methyl-substituted aldehydes by norcoclaurine synthases

R Roddan, G Gygli, A Sula, D Méndez-Sánchez… - ACS …, 2019 - ACS Publications

Norcoclaurine synthase (NCS) catalyzes a stereoselective Pictet–Spengler reaction to give the key intermediate,(S)-norcoclaurine in benzylisoquinoline alkaloid biosynthesis. This …

Innovative Three-Step Microwave-Promoted Synthesis of *N*-Propargyltetrahydroquinoline and 1,2,3-Triazole Derivatives as a Potential Factor Xa (FXa) …

F Santana-Romo, CF Lagos, Y Duarte, F Castillo… - Molecules, 2020 - mdpi.com

The coagulation cascade is the process of the conversion of soluble fibrinogen to insoluble fibrin that terminates in production of a clot. Factor Xa (FXa) is a serine protease involved in …

Peptide-Tetrahydroisoquinoline (THIQ) Conjugated Derivatives as Dual-Targeting Therapeutics: Superior VEGFR-2 Inhibition and Antioxidant Activity against Renal …

VS Jerra, SM Sharif, R Sundararaj… - International Journal of …, 2025 - Springer

Background Renal cell carcinoma (RCC) represents a therapeutic challenge due to aberrant angiogenesis and oxidative stress pathways, and more off-site target drugs. Current VEGFR …

Sulfonated nonsaccharide heparin mimetics are potent and noncompetitive inhibitors of human neutrophil elastase

RA Al-Horani, KF Aliter, S Kar, M Mottamal - ACS omega, 2021 - ACS Publications

Human neutrophil elastase (HNE) is a serine protease that plays vital roles in inflammation, innate immune response, and tissue remodeling processes. HNE has been actively pursued …

Lignosulfonic acid sodium is a noncompetitive inhibitor of human factor XIa

S Kar, P Bankston, DK Afosah, RA Al-Horani - Pharmaceuticals, 2021 - mdpi.com

The anticoagulant activity of lignosulfonic acid sodium (LSAS), a non-saccharide heparin mimetic, was investigated in this study. LSAS is a relatively safe industrial byproduct with …

Design, synthesis and biological evaluation of novel 2, 3-dihydroquinazolin-4 (1H)-one derivatives as potential fXa inhibitors

J Xing, L Yang, Y Yang, L Zhao, Q Wei, J Zhang… - European Journal of …, 2017 - Elsevier

Coagulation factor Xa (fXa) is a particularly attractive target for the development of effective and safe anticoagulants. In this study, novel 2, 3-dihydroquinazolin-4 (1 H)-one derivatives …

Discovery of glycyrrhetinic acid as an orally active, direct inhibitor of blood coagulation factor xa

L Jiang, Q Wang, S Shen, T Xiao, Y Li - Thrombosis research, 2014 - Elsevier

Abstract Introduction Factor Xa (FXa) plays an important role in blood coagulation. This study investigated glycyrrhetinic acid, a small molecule derived from Chinese herbs, and …

Discovery of chromen-7-yl furan-2-carboxylate as a potent and selective factor XIa inhibitor

AJ Obaidullah, RA Al-Horani - Cardiovascular & Hematological …, 2017 - ingentaconnect.com

Background: Direct inhibition of coagulation factor XIa (FXIa) carries a significant promise for developing effective and safe anticoagulants. Method: In this report, we studied 4-methyl-2 …
