Expedient Synthesis of a Library of Heparan Sulfate-Like “Head-to-Tail” Linked Multimers for Structure and Activity Relationship Studies

J Zhang, L Liang, W Yang, S Ramadan… - Angewandte …, 2022 - Wiley Online Library

Heparan sulfate (HS) plays important roles in many biological processes. The inherent complexity of naturally existing HS has severely hindered the thorough understanding of …

Designing allosteric inhibitors of factor XIa. Lessons from the interactions of sulfated pentagalloylglucopyranosides

RA Al-Horani, UR Desai - Journal of Medicinal Chemistry, 2014 - pmc.ncbi.nlm.nih.gov

We recently introduced sulfated pentagalloylglucopyranoside (SPGG) as an allosteric inhibitor of factor XIa (FXIa)(Al-Horani et al.,). To better understand the SPGG–FXIa …

A synthetic heparin mimetic that allosterically inhibits factor XIa and reduces thrombosis in vivo without enhanced risk of bleeding

RA Al-Horani, EI Abdelfadiel, DK Afosah… - … of Thrombosis and …, 2019 - Wiley Online Library

Background Human factor XI a (FXI a) is an actively pursued target for development of safer anticoagulants. Our long-standing hypothesis has been that allosterism originating from …

Precise structures and anti-intrinsic tenase complex activity of three fucosylated glycosaminoglycans and their fragments

Y Cai, W Yang, X Li, L Zhou, Z Wang, L Lin… - Carbohydrate …, 2019 - Elsevier

Fucosylated glycosaminoglycan (FG), a glycosaminoglycan derivative containing distinct sulfated fucose (FucS) branches, displays potent anticoagulant activity by inhibiting the …

Synthesis and reactivity of masked organic sulfates

B Kumar Villuri, UR Desai - Chemistry–A European Journal, 2024 - Wiley Online Library

Nature offers a variety of structurally unique, sulfated endobiotics including sulfated glycosaminoglycans, sulfated tyrosine peptides, sulfated steroids/bile acids/catecholamines …

Factor XIIIa inhibitors as potential novel drugs for venous thromboembolism

RA Al-Horani, S Kar - European journal of medicinal chemistry, 2020 - Elsevier

Abstract Human factor XIIIa (FXIIIa) is a multifunctional transglutaminase with a significant role in hemostasis. FXIIIa catalyzes the last step in the coagulation process. It stabilizes the …

Molecular principles for heparin oligosaccharide–based inhibition of neutrophil elastase in cystic fibrosis

AB Kummarapurugu, DK Afosah… - Journal of Biological …, 2018 - jbc.org

Cystic fibrosis (CF) is a multifactorial disease in which dysfunction of protease–antiprotease balance plays a key role. The current CF therapy relies on dornase α, hypertonic saline, and …

Synthetic, non-saccharide, glycosaminoglycan mimetics selectively target colon cancer stem cells

NJ Patel, R Karuturi, RA Al-Horani… - ACS chemical …, 2014 - pmc.ncbi.nlm.nih.gov

Selective targeting of cancer stem-like cells (CSCs) is a paradigm-shifting approach. We hypothesized that CSCs can be targeted by interfering with functions of sulfated …

Preferential recognition and antagonism of SARS-CoV-2 spike glycoprotein binding to 3-O-sulfated heparan sulfate

V Tiwari, R Tandon, NV Sankaranarayanan, JC Beer… - BioRxiv, 2020 - pmc.ncbi.nlm.nih.gov

The COVID-19 pandemic caused by SARS-CoV-2 is in immediate need of an effective antidote. Although the Spike glycoprotein (SgP) of SARS-CoV-2 has been shown to bind to …

Allosteric partial inhibition of monomeric proteases. Sulfated coumarins induce regulation, not just inhibition, of thrombin

S Verespy III, AY Mehta, D Afosah, RA Al-Horani… - Scientific Reports, 2016 - nature.com

Allosteric partial inhibition of soluble, monomeric proteases can offer major regulatory advantages, but remains a concept on paper to date; although it has been routinely …
