Glycan microarrays from construction to applications

Y Kim, JY Hyun, I Shin - Chemical Society Reviews, 2022 - pubs.rsc.org

Through their specific interactions with proteins, cellular glycans play key roles in a wide range of physiological and pathological processes. One of the main goals of research in the …

Glycan microarrays as chemical tools for identifying glycan recognition by immune proteins

C Gao, M Wei, TR McKitrick, AM McQuillan… - Frontiers in …, 2019 - frontiersin.org

Glycans and glycan binding proteins (GBPs or lectins) are essential components in almost every aspect of immunology. Investigations of the interactions between glycans and GBPs …

The receptor binding properties of H5Ny influenza A viruses have evolved to bind to avian-type mucin-like O-glycans

J Weber, NLD Ponse, X Zhu, M Ríos Carrasco… - PLoS …, 2026 - journals.plos.org

Highly pathogenic H5Ny influenza A viruses are causing unprecedented, season-independent outbreaks across avian and mammalian species, including dairy cattle, a novel …

The Q226L mutation can convert a highly pathogenic H5 2.3. 4.4 e virus to bind human-type receptors

M Ríos Carrasco, TH Lin, X Zhu… - Proceedings of the …, 2025 - pnas.org

H5Nx viruses continue to wreak havoc in avian and mammalian species worldwide. The virus distinguishes itself by the ability to replicate to high titers and transmit efficiently in a …

Asymmetrical biantennary glycans prepared by a stop-and-go strategy reveal receptor binding evolution of human influenza A viruses

S Ma, L Liu, D Eggink, S Herfst, RAM Fouchier… - JACS Au, 2024 - ACS Publications

Glycan binding properties of respiratory viruses have been difficult to probe due to a lack of biologically relevant glycans for binding studies. Here, a stop-and-go chemoenzymatic …

Glycan remodeled erythrocytes facilitate antigenic characterization of recent A/H3N2 influenza viruses

F Broszeit, RJ van Beek, L Unione… - Nature …, 2021 - nature.com

During circulation in humans and natural selection to escape antibody recognition for decades, A/H3N2 influenza viruses emerged with altered receptor specificities. These …

Analysis of carbohydrates and glycoconjugates by matrix-assisted laser desorption/ionization mass spectrometry: An update for 2017–2018

DJ Harvey - Mass Spectrometry Reviews, 2023 - Wiley Online Library

This review is the tenth update of the original article published in 1999 on the application of matrix-assisted laser desorption/ionization mass spectrometry (MALDI) mass spectrometry …

Revealing the specificity of human H1 influenza A viruses to complex N-Glycans

A Canales, J Sastre, JM Orduña, CM Spruit… - JACS Au, 2023 - pmc.ncbi.nlm.nih.gov

Influenza virus infection remains a threat to human health since viral hemagglutinins are constantly drifting, escaping infection and vaccine-induced antibody responses. Viral …

2019–2020 H1N1 clade A5a. 1 viruses have better in vitro fitness compared with the co-circulating A5a. 2 clade

NJ Swanson, P Marinho, A Dziedzic, A Jedlicka… - Scientific reports, 2023 - nature.com

Surveillance for emerging human influenza virus clades is important for identifying changes in viral fitness and assessing antigenic similarity to vaccine strains. While fitness and …

Glycomics and glycoproteomics of viruses: Mass spectrometry applications and insights toward structure–function relationships

JF Cipollo, LM Parsons - Mass spectrometry reviews, 2020 - Wiley Online Library

The advancement of viral glycomics has paralleled that of the mass spectrometry glycomics toolbox. In some regard the glycoproteins studied have provided the impetus for this …
